What is this product?

Type:

The Fund is an Exchange-Traded Fund ("ETF") and is a sub-fund of the Company, a company incorporated in Ireland with limited liability as an umbrella type open-ended UCITS investment company with variable capital and segregated liability between its sub-funds under the laws of Ireland with registered number 567964 and authorised by the Central Bank of Ireland.

Term:

The Fund has no maturity date. The Fund may be terminated unilaterally by the directors of the Company and there are circumstances in which the Fund can be terminated automatically, as further described in the prospectus.

Objectives:

Investment objective:

The investment objective of the Fund is to achieve the net total return performance of the NASDAQ-100 Equal Weighted Index® (the "**Index**"), less fees, expenses and transaction costs.

The Index:

The Index is an equal-weighted version of the NASDAQ-100 Index® (which measures the performance of 100 of the largest domestic and international Nasdaq-listed non-financial companies by market capitalization). The Index is constructed by including the same constituent securities of the NASDAQ-100 Index® but equally weights issuers at each rebalancing date, rather than weighting each issuer by float-adjusted market capitalisation. Security types eligible for inclusion include common stock, ordinary shares, tracking stocks, shares of beneficial interest, limited partnership interests and American Depositary Receipts ("ADRs") including ADRs that represent securities of non-US issuers.

The Index is rebalanced on a quarterly basis.

Investors should note that the Index is the intellectual property of the index provider. The Fund is not sponsored or endorsed by the index provider and a full disclaimer can be found in the Fund's prospectus.

Investment approach:

The Fund is a passively managed Exchange-Traded Fund.

To achieve the investment objective, the Fund will, as far as possible and practicable, hold all the shares in the Index in their respective weightings.

The Fund's base currency is USD.

The Fund may engage in securities lending, whereby 90% of the revenues arising from securities lending will be returned to the Fund and 10% of the revenues will be retained by the securities lending agent.

The Fund may be exposed to the risk of the borrower defaulting on its obligation to return the securities at the end of the loan period and of being unable to sell the collateral provided to it if the borrower defaults.

The Fund may use derivative instruments for the purposes of managing risk, reducing costs or generating additional capital or income.

Dividend Policy:

This Share Class does not pay you income, but instead reinvests it to grow your capital, in line with its stated objectives.

Redemption and Dealing of Shares:

The Fund's shares are listed on one or more Stock Exchange(s). Investors can buy or sell shares daily through an intermediary directly or on Stock Exchange(s) on which the shares are traded. In exceptional circumstances investors will be permitted to redeem their shares directly from Invesco Markets II plc in accordance with the redemption procedures set out in the prospectus, subject to any applicable laws and relevant charges.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 5 out of 7, which is a medium-high risk class. This rates the potential losses from future performance at a medium-high level, and poor market conditions will likely impact the ability for you to receive a positive return on your investment.

Be aware of currency risk. In some circumstances, you may receive payments in a different currency from your local currency, so the final return you will get may depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown here.

This product does not include any protection from future market performance so you could lose some or all of your investment.

For other risks materially relevant to this product which are not taken into account in the summary risk indicator, please refer to the prospectus and/or the Fund's supplement.
