### **Key Investor Information**

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

### **Objectives and Investment Policy**

- The Fund is a passively managed Exchange-Traded Fund (ETF), which aims to track the Total Return performance of the Bloomberg MSCI USD Liquid Corporate ESG Weighted Bond Index (the "Index")<sup>1</sup>, less fees, expenses and transaction costs.
- In order to achieve the investment objective, the Fund will employ sampling techniques to select securities from the Index that use factors such as the index weighted average duration and credit quality.
- The Fund's shares are listed on one or more Stock Exchange(s). Generally, only Authorised Participants may subscribe or redeem shares directly with the Fund. Other investors can buy or sell shares daily through an intermediary directly or on Stock Exchange(s) on which the shares are traded. In exceptional circumstances other investors will be permitted to redeem their shares directly from Invesco Markets II plc in accordance with the redemption procedures set out in the prospectus, subject to any applicable laws and relevant charges.
- The Fund's base currency is USD. The Share Class currency is GBP. To minimise exposure to fluctuations in the exchange rate between the Fund's base currency and the Share Class currency, the Share Class enters into foreign exchange transactions (typically FX forwards).
- **Dividend Policy:** This Fund declares and distributes a dividend on a quarterly basis.
- **Net Asset Value:** This is calculated daily and the Fund is open for subscriptions and redemptions on each day the United States Federal Reserve System is open. Please refer to the prospectus for further information.
- **The Index:** The Index aims to reflect the performance of USD-denominated investment grade, fixed-rate, taxable debt securities issued by US and non-US corporate issuers adjusted based upon certain environmental, social and governance ("ESG") metrics, which seek to increase overall exposure to those issuers demonstrating a robust ESG profile. The Index includes publicly issued securities by industrial, utility and financial institution issuers in global and regional markets. The securities which comprise the Index must be rated investment grade (Baa3/BBB-/BBB- or higher) using the middle rating of Moody's, S&P and Fitch. When a rating from only two agencies is available, the lower is used. When only one agency rates a bond, that rating is used. In cases where explicit bond level ratings may not be available, other sources may be used to classify securities by credit quality. In addition, securities comprising the Index must have 1,000 million USD minimum par amount outstanding except in the case of securities issued by utility issuers which must have a minimum par amount outstanding of 500 million USD. Bonds must have fixed-rate coupon issues and at least one year to final maturity regardless of optionality. Callable bonds are eligible for inclusion; callable bonds that convert fixed to floating rate, including fixed-to-float perpetual, are included during their fixed-rate term only and will exit the index one year prior to conversion to floating-rate. Fixed-rate perpetual bonds are not included. Securities are excluded that according to the index provider's exclusionary criteria: 1) have faced very severe controversies pertaining to ESG issues (including UN Global Compact violations) over the last three years; or 2) are involved in any of the following business activities: controversial weapons, conventional weapons, nuclear weapons, oil sands, thermal coal, tobacco and firearms; or 3) are issued by emerging market issuers. Each of the eligible component securities is then assigned an ESG score using MSCI ESG metrics. This ESG score is then applied to re-weight the eligible securities from their natural weights as a result of the notional size of the bond, to construct the weighting of the Index. The Index is rebalanced monthly.

### **Risk and Reward Profile**

- The Share Class is in risk category 4 due to the rises and falls of its price or simulated data in the past.
- As the Share Class' risk category has been calculated using historical data, it may not be a reliable indication of the Share Class' future risk profile.
- The risk category may change in the future and is not guaranteed.
- The lowest category does not mean a risk free investment.

### **Other Risks**

- **General Investment Risk:** The value of investments, and income from them, can go down as well as up and you may not get back the full amount you invested.
- **Concentration risk:** The Fund might be concentrated in a specific region or sector or be exposed to a limited number of positions, which might result in greater fluctuations in the value of the Fund than for a fund that is more diversified.
- **Credit risk:** The creditworthiness of the debt the Fund is exposed to may weaken and result in fluctuations in the value of the Fund. There is no guarantee the issuers of debt will repay the interest and capital on the redemption date. The risk is higher when the Fund is exposed to high yield debt securities.
- **Interest Rate Risk:** Changes in interest rates will result in fluctuations in the value of the Fund.
- **Environmental, Social and Governance Risk:** The Fund intends to invest in securities of issuers that manage their ESG exposures better relative to their peers. This may affect the Fund's exposure to certain issuers and cause the Fund to forego certain investment opportunities. The Fund may perform differently to other funds, including underperforming other funds that do not seek to invest in securities of issuers based on their ESG ratings.
- **Currency hedging:** Currency hedging between the base currency of the Fund and the currency of the share class may not completely eliminate the currency risk between those two currencies and may affect the performance of the share class.
- For more information on risks, please see the Fund prospectus under "Risk Factors", which is available at [efi.invesco.com](http://efi.invesco.com) (select your country and navigate to Product/Prospectus).

- \*Authorised Participants dealing directly with the Fund may pay an entry charge up to a maximum of 5% and an exit charge up to a maximum of 3%.
