Past performance is not a guide to future returns. Source: Invesco, Bloomberg L.P., FactSet. ETF performance shown is calculated with reference to the Net Asset Value, inclusive of net reinvested income and net of ongoing charges and portfolio transaction costs, in EUR. The figures do not reflect the actual share price, the impact of the bid/offer spread or broker commissions. ETF NAV performance differs from that of the index due to the ongoing charges and portfolio transaction costs and due to the fact that the ETF does not necessarily always hold all the securities in the index in their respective weighting. This ETF does not charge an entry fee. For share classes with fewer than five 12 month periods since launch, performance data does not exist for some of the periods covered in the standardised 12 month performance table. Prior to 17 February 2014, the Fund was managed with reference to another index, the FTSE RAFI Europe Index (gross). From 17 February 2014, the Fund is managed with reference to the FTSE RAFI Europe Index (Net Total Return) in EUR.

¹FTSE RAFI Europe Index: The FTSE Research Associates Fundamental Index Series® weights index constituents using specific fundamental factors, rather than market capitalisation. Therefore, at review, constituent weights are not based on price valuations established by the market. The review of the FTSE RAFI Index Series and the calculation of the fundamental weighting of a company are carried out using the following factors as found in a company's annual returns: Sales (averaged over the prior five years), Cash Flow (averaged over the prior five years), Book Value (at the review date), and Dividends (total dividend distributions averaged over the last five years).

Glossary

ETF: Exchange traded fund. A type of fund that is traded on the stockmarket like ordinary shares. ETFs can be bought and sold during trading hours, like ordinary shares, whereas other types of funds are priced once a day only.

Ongoing charge: is based on annualised expenses. It excludes portfolio transaction costs.

Hedged: Foreign exchange forward contracts are used to hedge asset classes, i.e., to protect them against currency fluctuations. The objective is to achieve a performance that is just as great as the performance of the underlying currency.

Replication Method: Strategy employed by the fund to achieve its objective. Physical funds invest directly in constituents of the benchmark index

UCITS: An abbreviation for "Undertakings for Collective Investment in Transferrable Securities". In a European legal context, these are investment funds that invest in legally defined types of securities and other financial instruments (securities funds).

UK Reporting Status: Indicates whether or not the fund has United Kingdom fund tax status, this can lead to a UK investor receiving favourable tax rates on any gain or disposal of holdings in the fund

ISA: Individual Savings Account. A type of investment account in the UK in which the tax on income is lower than usual, and there is no tax on profits made from an increase in the value of shares

SIPP: Self-Invested Pension Plan. A type of UK pension for which a person makes their own investment decisions

Distribution Yield: The distribution yield is a measurement of cash flow being paid. It's the sum of the distributions over 12 months divided by the net asset value (NAV) of the fund.

Preferred securities: A term used in the US for shares that are given precedence over other shares.
