Objectives and Investment Policy

- The Invesco AT1 Capital Bond UCITS ETF aims to achieve the performance of the iBoxx USD Contingent Convertible Liquid Developed Market AT1 (8/5% Issuer Cap) Index (the "Index")¹.
- In order to achieve the investment objective, the Fund will employ sampling techniques to select securities from the Index that use factors such as the index weighted average duration and industry sectors.
- The Fund's shares are listed on one or more Stock Exchange(s). Generally, only Authorised Participants may subscribe or redeem shares directly with the Fund. Other investors can buy or sell shares daily through an intermediary directly or on Stock Exchange(s) on which the shares are traded. In exceptional circumstances other investors will be permitted to redeem their shares directly from Invesco Markets II plc in accordance with the redemption procedures set out in the prospectus, subject to any applicable laws and relevant charges.
- The Fund's base currency is USD.
- **Dividend Policy:** This share class does not pay you income, but instead reinvests it to grow your capital, in line with its stated objectives.
- **Net Asset Value:** This is calculated daily and the Fund is open for subscriptions and redemptions on each day the United States Federal Reserve System is open. Please refer to the prospectus for further information.
- **The Index:** The Index aims to measure the performance of USD-denominated contingent convertible bonds issued by banks from developed countries worldwide. Securities comprising the Index must be rated by at least one of the three credit rating agencies, Moody's, Standard & Poor's or Fitch, but there is no minimum rating requirement. To be included in the, securities must have a minimum par amount outstanding of US\$750 million and the issuers must have a minimum notional outstanding of 1 billion in their local currency. In addition, the bonds must have been issued after 1 January 2013 and must have a remaining time to maturity of at least one year on the date of rebalancing. The issuer exposure is constrained to 8% of the Index in respect of the uncapped weight of the top five issuers. The weighting of the remaining issuers eligible for inclusion in the Index is capped at 5%. The capping takes effect when the Index has at least 17 issuers.

Risk and Reward Profile

- The Share Class is in risk category 3 due to the rises and falls of its price or simulated data in the past.
- As the Share Class' risk category has been calculated using historical data, it may not be a reliable indication of the Share Class' future risk profile.
- The risk category may change in the future and is not guaranteed.
- The lowest category does not mean a risk free investment.

Other Risks

- Main risks not covered by the above indicator which could negatively affect the net asset value of the Fund:
- **Contingent convertible bonds:** The Fund invests in contingent convertible bonds, a type of corporate debt security that may be converted into equity or could be forced to suffer a write down of principal upon the occurrence of a pre-determined event. If this occurs, the Fund could suffer losses. Other notable risks include liquidity and default risk.
- **Capital is not guaranteed:** The value of investments, and income from them, can go down as well as up and you may not get back the full amount you invested.
- **High yield securities:** The Fund will hold a large amount of debt securities which are of lower credit quality, and may result in large fluctuations in the value of the Fund or which may impact the liquidity of the Fund under certain circumstances.
- **Index tracking:** The Fund will not replicate the performance of its Index perfectly, this is because the Fund will incur drags on performance such as expenses and transactions costs, which the Index is not subject to. If the Fund is unable to hold the securities in the exact proportion required this will affect its ability to track the Index.
- **Liquidity on secondary market risk:** Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily. On-exchange liquidity may be limited due to Index suspension, a decision by one of the relevant stock exchanges, or a breach by the market maker of respective stock exchange requirements and guidelines.
- For more information on risks, please see the Fund prospectus under "Risk Factors", which is available at etf.invesco.com (select your country and navigate to Library/Supplement).
