Past performance is not a guide to future returns. Source: Invesco, Bloomberg L.P., FactSet. ETF performance shown is calculated with reference to the Net Asset Value, inclusive of net reinvested income and net of ongoing charges and portfolio transaction costs, in CHF. The figures do not reflect the actual share price, the impact of the bid/offer spread or broker commissions. ETF NAV performance differs from that of the index due to the ongoing charges and portfolio transaction costs and due to the fact that the ETF does not necessarily always hold all the securities in the index in their respective weighting. This ETF does not charge an entry fee. For share classes with fewer than five 12 month periods since launch, performance data does not exist for some of the periods covered in the standardised 12 month performance table.

¹The NASDAQ-100 Index includes 100 of the largest US and international non-financial securities listed on The NASDAQ Stock Market® (NASDAQ®) based on market capitalisation. The index reflects companies across major industry groups including computer hardware and software, telecommunications, retail/wholesale trade and biotechnology. It does not contain securities of financial companies including investment companies. On 5 April 2011, NASDAQ OMX announced that the NASDAQ-100 Index would undergo a Special Rebalance in order to bring the weights of the index securities closer in line with their actual market capitalisations.

Glossary

ETF: Exchange traded fund. A type of fund that is traded on the stockmarket like ordinary shares. ETFs can be bought and sold during trading hours, like ordinary shares, whereas other types of funds are priced once a day only.

Ongoing charge: is based on annualised expenses. It excludes portfolio transaction costs.

Hedged: Foreign exchange forward contracts are used to hedge asset classes, i.e., to protect them against currency fluctuations. The objective is to achieve a performance that is just as great as the performance of the underlying currency.

Replication Method: Strategy employed by the fund to achieve its objective. Physical funds invest directly in constituents of the benchmark index

UCITS: An abbreviation for "Undertakings for Collective Investment in Transferable Securities". In a European legal context, these are investment funds that invest in legally defined types of securities and other financial instruments (securities funds).

Distribution Yield: The distribution yield is a measurement of cash flow being paid. It's the sum of the distributions over 12 months divided by the net asset value (NAV) of the fund.

Preferred securities: A term used in the US for shares that are given precedence over other shares.
