Investment objective

The Invesco US High Yield Fallen Angels UCITS ETF (EUR Hdg Acc) aims to provide investors with investment results which, before expenses, correspond to the price and yield performance of the FTSE Time-Weighted US Fallen Angel Bond Select Index ("the Benchmark") in US dollar terms by holding, as far as possible and practicable, a sample of the Benchmark's constituents. The portfolio follows the Benchmark's monthly rebalancing. To minimise exposure to fluctuations in the exchange rate between USD and EUR, the EUR Hedged share class enters into foreign exchange transactions (typically short dated currency forwards, with the hedge reset daily to 100% of NAV). Please note that, prior to 29 May 2018, the name of this product was PowerShares US High Yield Fallen Angels UCITS ETF (EUR Hdg Acc).

Benchmark index description

Please note on 31 July 2018 the benchmark changed its name from Citi Time-Weighted US Fallen Angel Bond Select Index to FTSE Time-Weighted US Fallen Angel Bond Select Index. This has not impacted the investment objective of this ETF. The Benchmark is designed to measure the performance of "fallen angels" - bonds which were previously rated investment-grade, but were subsequently downgraded to high-yield². The Benchmark is based on the FTSE Time-Weighted US Fallen Angel Bond Index which includes USD-denominated bonds issued by corporations³ domiciled in the US or Canada. Any such bonds with a rating changed from investment-grade to high-yield in the previous month are eligible for inclusion and will be held for a period of 60 months⁴, provided they continue to meet the inclusion criteria⁵. If a bond exits and then re-enters the Benchmark, the inclusion period is reset. Unlike indices where constituent weights are based on market value, the Benchmark's weights are determined based on the time from inclusion, with higher weights assigned to bonds that have more recently become "fallen angels" (aiming to capture the potential price rebound effect that fallen angels may experience soon after their initial downgrade to high-yield). An issuer cap of 5% is applied. For liquidity, each issue is also capped at 5x its original market value weight.

Performance of EUR 10,000 since 31 October 2017

Past performance is not a guide to future returns. Source: Invesco, Bloomberg L.P. ETF performance shown is calculated with reference to the Net Asset Value, inclusive of net reinvested income and net of ongoing charges and portfolio transaction costs, in EUR. The figures do not reflect the actual share price, the impact of the bid/offer spread or broker commissions. ETF NAV performance differs from that of the index due to the ongoing charges and portfolio transaction costs and due to the fact that the ETF does not necessarily always hold all the securities in the index in their respective weighting.

Risk warnings

The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested.

In tracking the Index, the ETF will be concentrated in a single country or a small number of countries. Investors should be prepared to accept a higher degree of risk than for a fund that is geographically diversified.

Debt instruments are exposed to credit risk which is the ability of the borrower to repay the interest and capital on the redemption date.

Changes in interest rates will result in fluctuations in the value of the ETF.

The ETF may hold a significant amount of debt instruments which are of lower credit quality and this may result in large fluctuations of the value of the ETF as well as impacting its liquidity under certain circumstances.

Important information

This document is directed at Professional Clients and Financial Advisers in Austria, Denmark, Finland, France, Germany, Italy, Luxembourg, the Netherlands, Norway, Spain, Sweden and Qualified Investors in Switzerland only and is not for consumer use. This document is marketing material and is not intended as a recommendation to invest in any particular asset class, security or strategy. Regulatory requirements that require impartiality of investment/investment strategy recommendations are therefore not applicable nor are any prohibitions to trade before publication. The information provided is for illustrative purposes only, it should not be relied upon as recommendations to buy or sell securities.

¹ The ongoing charges figure is based on annualised expenses. It excludes portfolio transaction costs.

² The Benchmark index also includes bonds that were originally rated high-yield, subsequently rated investment grade, then downgraded again to high-yield.

³ Includes Industrial, Utility and Finance sectors.

⁴ The inclusion period for each bond is measured in terms of consecutive months. The maximum inclusion period rule will be suspended should the number of issuers in the index fall below 20 to mitigate issuer concentration risk. Such suspension of the rule will be maintained until at least 20 issuers are eligible for inclusion in the index.

⁵ Design criteria and calculation methodology:

Coupon: Fixed-rate. Currency: USD. Minimum Maturity: At least one year.

Maximum inclusion period: 60 months⁴. Minimum issue size: USD 250 million.

Credit quality: Maximum quality: BB+ by Index quality. Minimum quality: C by Index quality (excludes defaulted bonds).

Composition: Cash-pay, zero-to-full (ZTF), pay-in-kind (PIK), step-coupon bonds, and Rule 144A bonds issued by corporations domiciled in the United States or Canada.

Index quality is defined to be the rating assigned by Standard & Poor's Financial Services LLC ("S&P") when it exists. If a bond is not rated by S&P, but it is rated by Moody's Investor Services, Inc. ("Moody's"), the S&P equivalent of the Moody's rating is assigned. If a bond is split-rated, that is rated investment-grade by S&P or Moody's and high-yield by the other, index quality is taken to be the S&P equivalent of the investment-grade rating. For more information on how "Index quality" is defined and the weighting methodology, please see their respective sections in the FTSE Fixed Income Index Guide (http://www.yieldbook.com/f/m/pdf/ftse_indexes/FTSE-Fixed-Income-Indexes-Guide-20180730.pdf).

⁶ The yields shown are expressed as % per annum of current NAV of the fund. They are estimates for the next 12 months, assuming that the fund's portfolio remains unchanged and there are no defaults or deferrals of coupon payments or capital repayments. They are not guaranteed. They do not reflect the entry charge of the fund. Investors may be subject to tax on distributions. Cash income is estimated coupons from bonds and, where applicable, estimated dividends from equities.

Weighted average coupon: The coupon is the annual interest rate paid by a bond issuer on the face value of the bond. The Benchmark index's (or the ETF's) weighted average coupon is calculated as the average of the underlying bonds' coupon rates, adjusted to take account of their weight (size) within the Benchmark index (or the ETF).

Yield to worst: The lowest yield an investor can expect when investing in a callable bond.

Weighted average yield to maturity: The Benchmark index's (or the ETF's) rate of return anticipated on a bond if held until maturity. Yield to maturity of the Benchmark index (or the ETF) is calculated as the average of the underlying bonds' yields, adjusted to take account of their relative weight (size) within the Benchmark index (or the ETF).

Weighted average maturity: A bond's maturity is the length of time until the bond's principal amount is due to be repaid. Weighted average maturity of the Benchmark index (or the ETF) is calculated as the average of the underlying bonds' maturities, adjusted to take account of their relative weight (size) within the Benchmark index (or the ETF).

Effective duration: A measure of the potential impact on a bond's (or a portfolio of bonds') price of a 1% change in interest rates, across all maturities. This measure takes into account the possible changes in expected bond cash flows for bonds with embedded optionality (for example, the bond issuer's right to redeem bonds at a pre-determined price on certain dates) due to the 1% change in interest rates.

Modified Duration: The approximate percentage change (price sensitivity) in a bond's price for a 1% change in yield, assuming that the bond's expected cash flow does not change when the yield changes.

OAS (Option-Adjusted Spread): The measurement of the spread of a bond rate and the risk-free rate of return, adjusted to take into account an embedded option.

The performance shown does not take account of the commissions and costs incurred on the issue and redemption of units.

By accepting this document, you consent to communicate with us in English, unless you inform us otherwise. Where individuals or the business have expressed opinions, they are based on current market conditions, they may differ from those of other investment professionals and are subject to change without notice. The distribution and the offering of the ETF in certain jurisdictions may be restricted by law. Persons into whose possession this document may come are required to inform themselves about and to comply with any relevant restrictions. This does not constitute an offer or solicitation by anyone in any jurisdiction in which such an offer is not authorised or to any person to whom it is unlawful to make such an offer or solicitation. Persons interested in acquiring the ETF should inform themselves as to (i) the legal requirements in the countries of their nationality, residence, ordinary residence or domicile: (ii) any foreign exchange controls: and (iii) tax consequences which might be relevant.

Restricted Investors

The share class's shares are neither registered for public distribution, nor listed on any exchange, in jurisdictions in Continental Europe other than in Austria, Denmark, Finland, France, Germany, Italy, Luxembourg, the Netherlands, Norway, Spain, Sweden as well as Switzerland. As a consequence, this share class's shares may not be offered or distributed by way of public advertisement or public offer in other jurisdictions in Continental Europe. The share class's shares may only be offered and the Key Investor Information Document, Prospectus and marketing materials on the share class may only be distributed in other jurisdictions in Continental Europe, without public solicitation and in compliance with the private placement rules or equivalent exemption set forth in the laws, rules and regulations of the jurisdictions concerned. Any resale of the share class in these countries may only be made in accordance with the relevant applicable laws governing the sale and offering of financial products.

Any investment in an ETF should be made on the basis of the relevant Prospectus and Key Investor Information Documents, including consideration of the investment objective, risks, charges and expenses. Further information on the ETF, including the Prospectus, Key Investor Information Documents and Supplements available at etf.invesco.com. This document is intended for information purposes in regard to the existence and potential benefits of investing in an ETF. However, it is not intended to provide specific investment advice including, without limitation, investment, financial, legal, accounting or tax advice, or to make any recommendations about the suitability of an ETF for the circumstances of any particular investor. You should take appropriate advice as to any securities, taxation or other legislation affecting you prior to investment.

The Invesco US High Yield Fallen Angels UCITS ETF (the “Fund”) has been developed solely by Invesco.
