Invesco Commodity Composite UCITS ETF

LGCU

Fund objective

The Invesco Commodity Composite UCITS ETF aims to track the total return performance of the Solactive Commodity Composite Index, less fees.

An investment in this fund is an acquisition of units in a passively managed, index tracking fund rather than in the underlying assets owned by the fund.

ETF information

Fund launch date	20 December 2011
Share class launch date	20 December 2011
Ongoing charge ¹	0.40% p.a.
Swap fee ¹	0.35% p.a.
Fund base currency	USD
Share class currency	USD
Currency hedged	No
Index	Solactive Commodity Composite Index (USD)
Index currency	USD
Index Bloomberg ticker	SOLCOMCO
Replication method	Synthetic
UCITS compliant	Yes

SEDOL	B4VTQ94
Bloomberg ticker	LGCU LN
Fund size	USD 61.74m
NAV per share	USD 92.85
Shares in issue	664,975
SFDR Classification	Article 6

¹ Ongoing charge includes management fee, custody and administration costs but excludes transaction costs such as swap costs. The total cost is the sum of the ongoing charge figure and swap fee. Costs may increase or decrease as a result of currency and exchange rate fluctuations. Consult the legal documents for further information on costs.

Investment risks

For complete information on risks, refer to the legal documents. The value of investments, and any income from them, will fluctuate. This may partly be the result of changes in exchange rates. Investors may not get back the full amount invested. The Fund's ability to track the benchmark's performance is reliant on the counterparties to continuously deliver the performance of the benchmark in line with the swap agreements and would also be affected by any spread between the pricing of the swaps and the pricing of the benchmark. The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss. Instruments providing exposure to commodities are generally considered to be high risk which means there is a greater risk of large fluctuations in the value of the instrument. The fund might purchase securities that are not contained in the reference index and will enter into swap agreements to exchange the performance of those securities for the performance of the reference index.

About the index

The Solactive Commodity Composite Index is a strategy index designed to offer high quality, diversified commodity exposure. It comprises a minimum of three constituent indices, selected from a universe of broad commodity indices. Index composition is reviewed at least once a year. A full description is available at www.solactive.com/indices.

Past performance does not predict future returns.

Indexed performance, % growth over the last 10 years

Cumulative performance as at 31 January 2024 (%)

Source: Invesco, Bloomberg L.P., FactSet. ETF performance shown is calculated with reference to the Net Asset Value, inclusive of net reinvested income and net of ongoing charges and portfolio transaction costs, in USD. The figures do not reflect the actual share price, the impact of the bid/offer spread or broker commissions. Returns may increase or decrease as a result of currency fluctuations. ETF NAV performance differs from that of the index due to the ongoing charges and portfolio transaction costs and due to the fact that the ETF does not necessarily always hold all the securities in the index in their respective weighting. This ETF does not charge an entry fee.

Important information

This marketing communication is for consumer use in the UK only. This document contains information that is for discussion purposes only.

For information on our funds and the relevant risks, refer to the Key Information Documents/Key Investor Information Documents (local languages) and Prospectus (English, French, German), and the financial reports, available from www.invesco.eu. A summary of investor rights is available in English from www.invescoinvestmentcompany.ie. The management company may terminate marketing arrangements.

This is marketing material and not financial advice. It is not intended as a recommendation to buy or sell any particular asset class, security or strategy. Regulatory requirements that require impartiality of investment/investment strategy recommendations are therefore not applicable nor are any prohibitions to trade before publication.

If investors are unsure if this product is suitable for them, they should seek advice from a financial adviser.

Current tax levels and reliefs may change. Depending on individual circumstances, this may affect investment returns.

UCITS ETF's units / shares purchased on the secondary market cannot usually be sold directly back to UCITS ETF. Investors must buy and sell units / shares on a secondary market with the assistance of an intermediary (e.g. a stockbroker) and may incur fees for doing so. In addition, investors may pay more than the current net asset value when buying units / shares and may receive less than the current net asset value when selling them.

The Fund is not sponsored, promoted, sold or supported in any other manner by Solactive AG nor does Solactive AG offer any express or implicit guarantee or assurance either with regard to the results of using the reference index and/or reference index trade mark or the reference index price at any time or in any other respect. The reference index is calculated and published by Solactive AG. Solactive AG uses its best efforts to ensure that the reference index is calculated correctly. Irrespective of its obligations towards the issuer, Solactive AG has no obligation to point out errors in the reference index to third parties including but not limited to investors and/or financial intermediaries of the Fund. Neither publication of the reference index by Solactive AG nor the licensing of the reference index or reference index trade mark for the purpose of use in connection with the Fund constitutes a recommendation by Solactive AG to invest capital in said Fund nor does it in any way represent an assurance or opinion of Solactive AG with regard to any investment in this Fund. The directors of the company, the manager, the investment manager, the sub-investment manager and the index provider together the "responsible parties" do not guarantee the accuracy and/or the completeness of any description relating to the reference index or any data included therein and the responsible parties shall have no liability for any errors, omissions, or interruptions therein. The responsible parties make no warranty, express or implied, as to the Fund, to any shareholder in the Fund, or to any other person or entity in respect of the reference index described herein. The index provider makes no express or implied warranties, and expressly disclaims all warranties of merchantability or fitness for a particular purpose or use with respect to the reference index or strategy or any data included herein. Without limiting any of the foregoing, in no event shall the index provider have any liability for any special, punitive, indirect, or consequential damages or for any lost profits, even if notified of the possibility of such damages

For the full objectives and investment policy please consult the current prospectus.

Glossary

Benchmark: An index against which the ETF is measured, in terms of relative performance, risk and other useful comparisons.

Derivative: Derivatives are financial instruments whose prices are driven by the price shifts or price expectations of another financial instrument, which is called the "underlying". Many derivatives are designed to react disproportionately to shifts in the price of the underlying. Derivatives can be used for both hedging and speculative purposes. The most common derivatives are certificates, options, futures and swaps.

ETF: Exchange traded fund. A type of fund that is traded on the stockmarket like ordinary shares. ETFs can be bought and sold during trading hours, like ordinary shares, whereas other types of funds are priced once a day only.

Futures Contract: An agreement between two parties to sell a certain quantity of goods on pre-determined terms, with delivery and settlement at a later point in time.

Hedged: The intended result of reducing the portfolio's exposure to a specific risk, such as the risk of fluctuations between currency exchange rates ("currency hedging").

ISA: Individual Savings Account. A type of investment account in the UK in which the tax on income is lower than usual, and there is no tax on profits made from an increase in the value of shares.

Replication Method: Strategy employed by the fund to achieve its objective.

SIPP: Self-Invested Pension Plan. A type of UK pension for which a person makes their own investment decisions.

Spot Price: The spot price is the current date's price for securities, currencies, gold or other assets traded on that date. The spot price is in contrast to the futures price (i.e., a future price agreed today).

Swap: A swap is a derivative contract where two parties agree to exchange separate streams of cashflows or returns.

Synthetic Replication: Synthetic funds own a diversified portfolio of equities that may differ from the benchmark index. The ETF contracts with one or more banks (each a counterparty), which agree to pay any difference between the portfolio performance and the index performance, less any applicable fees. These contracts are known as swaps. Using swaps ensures accurate index tracking but introduces counterparty risk: if a counterparty failed to pay the index performance due under the swap contract, the ETF would instead rely on the performance of its portfolio of equities, which could be lower than the index performance. An ETF's exposure to a swap counterparty is limited by the UCITS regulation, and further limited by measures that we impose.

UCITS: Undertakings for Collective Investments in Transferable Securities. European regulatory framework for an investment vehicle that can be marketed across the European Union.

UK Reporting Status: Indicates whether or not the fund has United Kingdom fund tax status, this can lead to

a UK investor receiving favourable tax rates on any gain or disposal of holdings in the fund.
