**Past performance is not a guide to future returns.** Source: Invesco, Bloomberg L.P., FactSet. ETF performance shown is calculated with reference to the Net Asset Value, inclusive of net reinvested income and net of ongoing charges and portfolio transaction costs, in USD. The figures do not reflect the actual share price, the impact of the bid/offer spread or broker commissions. ETF NAV performance differs from that of the index due to the ongoing charges and portfolio transaction costs and due to the fact that the ETF does not necessarily always hold all the securities in the index in their respective weighting. This ETF does not charge an entry fee. For share classes with fewer than five 12 month periods since launch, performance data does not exist for some of the periods covered in the standardised 12 month performance table. From relaunch until 17 February 2014, the Fund was managed with reference to another index, the FTSE RAFI Emerging Markets Index (gross). From 17 February 2014, the Fund is managed with reference to the FTSE RAFI Emerging Markets Index (Net Total Return) in USD.

<sup>1</sup>The FTSE Research Affiliates Fundamental Index Series® weights index constituents using specific fundamental factors, rather than market capitalisation. Therefore, at review, constituent weights are not based on price valuations established by the market. The review of the FTSE RAFI Index Series and the calculation of the fundamental weighting of a company are carried out using the following factors as found in a company's annual returns: Sales (averaged over the prior five years), Cash Flow (averaged over the prior five years), Book Value (at the review date), and Dividends (total dividend distributions averaged over the last five years).

#### Investment risk

The value of investments, and any income from them, will fluctuate. This may partly be the result of changes in exchange rates. Investors may not get back the full amount invested.

As a large portion of this fund is invested in less developed countries, investors should be prepared to accept a higher degree of risk than for an ETF that invests only in developed markets.
