### Investment objective

The Invesco EuroMTS Cash 3 Months UCITS ETF aims to provide investors with investment results which, before expenses, correspond to the price and yield performance of the FTSE MTS Eurozone Government Bill 0-6 Month Capped Index in Euro terms by holding, as far as practicable, a representative sample of the Index's constituents. Please note that, prior to 29 May 2018, the name of this product was PowerShares EuroMTS Cash 3 Months UCITS ETF.

### Benchmark index description

The Index only includes actively quoted eurozone countries sovereign bills<sup>3</sup> (Selected Bills), but the weight of each bill reflects the total size of each country's bill market as listed on the MTS Platform (whether quoted or not) and falling in the correct maturity range.

The FTSE MTS Government Bill Indices measure the total return of a portfolio of sovereign bills issued by eurozone countries and listed on the MTS bond platform. In the 0-6 months maturity bucket, each issuer within the Index is weighted by market capitalisation and capped to a maximum of 34.5%. Coupons paid out on any bond in an index portfolio are reinvested overnight in the index itself without deduction of any withholding tax. The Index is priced using live quotes from the MTS inter-dealer platform and rebalanced every calendar week.

### Performance of EUR 10,000 since 31 October 2008

**Past performance is not a guide to future returns.** Source: Invesco, Bloomberg L.P.. ETF performance shown is calculated with reference to the Net Asset Value, on a mid-to-mid basis, inclusive of net reinvested income and net of ongoing charges and portfolio transaction costs, in EUR. The figures do not reflect the actual share price, the impact of the bid/offer spread or broker commissions. ETF NAV performance differs from that of the index due to the ongoing charges and portfolio transaction costs and due to the fact that the ETF does not necessarily always hold all the securities in the index in their respective weighting.

When making an investment in an ETF you are buying shares in a company that is listed on a stock exchange. It is expected that the shares of the ETF will trade closely to its Net Asset Value (NAV), and because of the exchange-traded fund structure, that a significant discount or premium to the NAV will not be sustained over the long term. However, supply of, and demand for, the shares on the relevant exchange together with any disruptions to creations and redemptions of units in the underlying fund may result in share prices that differ

significantly from the NAV and there can be no certainty that there will be liquidity in the shares on any exchange. Only Authorised Participants, as defined in the Prospectus of the ETF, can request the Manager to create and redeem units in the underlying fund.

Persons interested in acquiring the ETF should inform themselves as to (i) the legal requirements in the countries of their nationality, residence, ordinary residence or domicile: (ii) any foreign exchange controls: and (iii) tax consequences which might be relevant.

UCITS ETF's units / shares purchased on the secondary market cannot usually be sold directly back to UCITS ETF. Investors must buy and sell units / shares on a secondary market with the assistance of an intermediary (e.g. a stockbroker) and may incur fees for doing so. In addition, investors may pay more than the current net asset value when buying units / shares and may receive less than the current net asset value when selling them.
