Investment objective

The Invesco FTSE RAFI UK 100 UCITS ETF aims to provide investors with investment results which, before expenses, correspond to the price and yield performance of the FTSE RAFI UK 100 Net Total Return Index (an index weighted using a composite of fundamental factors) in Pound Sterling terms by holding, as far as practicable, all of the Index's constituents in their respective weighting. The portfolio follows the index's annual review (in March each year). Please note that, prior to 29 May 2018, the name of this product was PowerShares FTSE RAFI UK 100 UCITS ETF.

Benchmark index description

The FTSE Research Affiliates Fundamental Index Series[®] weights index constituents using specific fundamental factors, rather than market capitalisation. Therefore, at review, constituent weights are not based on price valuations established by the market. The review of the FTSE RAFI Index Series and the calculation of the fundamental weighting of a company are carried out using the following factors as found in a company's annual returns: Sales (averaged over the prior five years), Cash Flow (averaged over the prior five years), Book Value (at the review date), and Dividends (total dividend distributions averaged over the last five years).

Performance of GBP 10,000 since 31 December 2007

Past performance is not a guide to future returns. Source: Invesco, Bloomberg L.P. ETF performance shown is calculated with reference to the Net Asset Value, inclusive of net reinvested income and net of ongoing charges and portfolio transaction costs, in GBP. The figures do not reflect the actual share price, the impact of the bid/offer spread or broker commissions. ETF NAV performance differs from that of the index due to the ongoing charges and portfolio transaction costs and due to the fact that the ETF does not necessarily always hold all the securities in the index in their respective weighting.

This document is intended for information purposes in regard to the existence and potential benefits of investing in an ETF. However, it is not intended to provide specific investment advice including, without limitation, investment, financial, legal, accounting or tax advice, or to make any recommendations about the suitability of an ETF for the circumstances of any particular investor. You should take appropriate advice as to any securities, taxation or other legislation affecting you prior to investment.

Using the RAFI index methodology, a stock's weight is derived from the composite of its 5 year average book value, cash flow, sales and dividends and that weighting determines the percentage of the index that will be invested in that stock. Each of the four metrics are obtained from the published accounts of the companies and the weighting is calculated in the same manner each time.
