

Invesco Physical Gold GBP Hedged ETC

This document is for use in the UK and Ireland only, and for Professional / Qualified Investors and Qualified Clients as specified in the Important Information section. It is not for consumer use in other countries. Please do not redistribute. This factsheet contains a summary of the Invesco Physical Gold GBP Hedged ETC, an exchange traded commodity (ETC), and is for discussion purposes only. Please consult the prospectus and note the additional important information overleaf.

Investment objective

The Invesco Physical Gold GBP Hedged ETC aims to provide the performance of the spot gold price hedged into GBP, less fees.

Key advantages

- Efficient tracking of the spot price
- Transparent fees and costs

Key risks

- No capital protection: you may not get back the amount you invested
- If the issuer cannot pay the specified return, the precious metal will be used to repay investors. Investors will have no claim on the other assets of the Issuer
- Commodities may be more volatile than other investments
- Currency hedging between the currency in which the underlying precious metal is typically quoted and the currency of the certificates may not completely eliminate the currency fluctuations between those two currencies and may affect the performance of the certificates.

About the spot gold price

The ETC aims to provide the performance of gold, as measured by the LBMA Gold Price (PM), which is a recognised benchmark for gold. The PM price is agreed at 3pm London time and is quoted in US dollars per fine troy ounce.

Benchmark composition

Portfolio weightings and allocations may change.

Performance

The table shows performance over the past five years to the most recent month end. ETC performance is in the base currency, and is based on Net Asset Value after management fees. It does not consider commissions or custody fees payable when buying, holding or selling the ETC. The ETC does not charge entry or exit fees. Each period starts at the end of the indicated month. The first indicated month may not represent a full month and may start only on the launch/restructuring date indicated in this factsheet. **Past performance (actual or simulated) is not a reliable indicator of future performance.**

What are Invesco P-ETCs?

"P-ETC" is the trademark name for our Physically Secured Exchange Traded Commodities. With P-ETCs, investors can get exposure to spot commodity prices, without taking physical delivery of those commodities. Invesco P-ETCs are certificates that can be bought and sold on a stock exchange. Note that certificates are a type of debt security, where the Issuer agrees to pay the investor a specified return. They are not regulated funds. Invesco P-ETCs are secured by a physical amount of the relevant commodity, held by the Custodian. If the Issuer cannot pay the specified return, the commodities held will be used to repay investors. However, investors have no claim on other assets of the Issuer (limited recourse).

How does the hedged ETC achieve its investment objective?

When investors purchase hedged ETCs, the Issuer invests in gold bullion which is stored in the Custodian's London vaults and valued daily at the official LBMA price. The ETC uses a hedging mechanism which is designed to reduce the exposure of the underlying precious metal (and hence the relevant certificates) to exchange rate fluctuations between US dollars and the currency in which the ETC is denominated. Gold bullion equal to at least the full value of the certificates will be held in an allocated account in the name of the issuer. The mark-to-market of the hedging mechanism is realised daily through the purchase or sale of physical gold to ensure the structure remains fully invested in gold.
