The chart on the table below lists levels of tracking errors ranges for the current products listed in Europe utilised by the Investment Manager.

[^] SPVX, FACH, FAEU and FAGB tracking error is considered normal. Due to the size of the Fund it is very difficult to match the index exactly. One of the main components is VIX futures which are very volatile and create this tracking error.

Tracking Difference is defined as the difference between the portfolio returns and the index returns. These differences are highlighted on page 8-9.

Tracking error is defined as the standard deviation of the monthly differences between the portfolio and benchmark returns over a given time period (YTD, 1 year, 2 years, 3 years, since inception, etc.). These are highlighted above.

Causes of Tracking Error

ETFs, like index Funds, are designed to track a specific market segment, investment theme or widely followed benchmark. Since they are passive in nature, tracking error for an ETF should be low or non-existent in theory. The causes of tracking error for ETFs can include, but are not limited to the following: holdings/size of the fund, regulatory issues/constraints and cash flows and fees.

The greatest challenge for our Funds tends to be cash management due to fund size and, given the concentrated nature of some of the Funds and limited liquidity on certain securities, a modest amount of tracking error is unavoidable. The report uses at least 12 months of performance difference between Fund and index to obtain an accurate tracking error value for the Funds.

Tracking Error Analysis (continued)

Tracking Error Exception

At the direction of the Board of the Company, we have been providing a quarterly tracking error analysis using the tracking error ranges noted as a reference point. The Investment Manager will periodically revisit the "minimum" and "maximum" of each Fund to make sure it is still appropriate as well as alternative measurements to gauge tracking accuracy.

Correlation Analysis

Correlation represents the relationship between two or more variables with a value assigned between 1 and -1. Correlation is the degree to which these variables are observed to move together: if they move in the same direction, there is positive correlation; if they move in opposite directions, there is negative correlation. A value of 1 indicates they are perfectly correlated and a value of -1, means they are exact opposites. The calculated value usually falls somewhere in between indicating the degree of linear dependence between the variables. The closer the coefficient is to either 1 or -1, the stronger or weaker the correlation between the variables (in this case the Fund and index).

The table below outlines the correlation of each of the funds compared to their respective underlying indices. At least 1 year of data is beneficial when doing correlation analysis for the Funds. To get the 1 year figures, monthly data was used for the analysis.

Please see the below table for detailed correlation analysis by Fund.

5. Taxation

Under current law and practice the Company qualifies as an investment undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997, as amended. On that basis, it is not chargeable to Irish tax on its income or gains.

However, Irish tax may arise on the happening of a "chargeable event". A chargeable event includes any distribution payments to shareholders, any encashment, redemption, cancellation or transfer of shares and the holding of shares at the end of each eight year beginning with the acquisition of such shares.

No Irish tax will arise on the Company in respect of chargeable events in respect of:

a) A Shareholder who is neither Irish resident nor ordinarily resident in Ireland for tax purposes, at the time of the chargeable event, provided appropriate valid declarations in accordance with the provisions of the Taxes Consolidation Act, 1997, as amended, are held by the Company or Company has been authorised by the Irish Revenue to make gross payments in the absence of appropriate declarations; and

b) Certain exempted Irish tax resident shareholders who have provided the Company with the necessary signed statutory declarations.

Dividends, interest and capital gains (if any) received on investments made by the Company may be subject to withholding taxes imposed by the country from which the investment income/gains are received and such taxes may not be recoverable by the Company or its shareholders.

The Finance Act 2010 provides that the Revenue Commissioners may grant approval for investment funds marketed outside of Ireland to make payments to non-resident investors without deduction of Irish tax where no relevant declaration is in place, subject to meeting the "equivalent measures". A company wishing to receive approval must apply in writing to the Revenue Commissioners, confirming compliance with the relevant conditions.

6. Fair value levels

Under amendments to FRS 102 - Fair Value Hierarchy Disclosures, the Company is required to classify fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements.

The fair value hierarchy has the following levels:

Level 1 - Quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 - Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices); and

Notes to the Financial Statements (continued)

6. Fair value levels (continued)

Level 3 - Inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The determination of what constitutes 'observable' requires significant judgement by the Company. The Company considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

Furthermore, for those instruments which have significant unobservable inputs (Level 3), the standard requires disclosures on the transfers into and out of Level 3, a reconciliation of the opening and closing balances, total gains and losses for the financial period split between those recognised in the Statement of Comprehensive Income and recognised through the statement of total recognised gains and losses, purchases, sales issues and settlements, and a sensitivity analysis of assumptions used in determining the fair value of Level 3 positions.

8. Translation adjustment

The translation adjustment arises as a result of using exchange rates as at 31 March 2021 to translate non USD amounts on the Statement of Financial Position and the average exchange rate for the financial period ended 31 March 2021 to translate non USD amounts on the Statement of Comprehensive Income and Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares. These techniques and instruments may include investments in financial derivative instruments such as futures (which may be used to manage interest rate risk), options (which may be used to achieve cost efficiencies, for example where the acquisition of the option is more cost effective than purchasing of the underlying asset), swaps and forward currency exchange contracts (both of which may be used to manage currency risk against the base currency of a Fund and/or any functional currency of a Fund). Such techniques and instruments will be utilised in accordance with the requirements of the Central Bank of Ireland. New techniques and instruments may be developed which may be suitable for use by the Company and the Company (subject as aforesaid) may employ such techniques and instruments. A Fund may enter into stock lending, repurchase and/or reverse repurchase agreements for the purposes of efficient portfolio management in accordance with the provisions of the UCITS Regulations.

13. Significant Events during the financial period

Managing the risks presented by the outbreak of Coronavirus

The spread of the coronavirus (COVID-19) disease has caused significant volatility within the global economy and financial markets. To date, the primary focus of our response has been threefold:

- to ensure the health and safety of our employees;
- to preserve our ability to serve our clients; and
- to appropriately manage client assets in a highly dynamic market environment.

We have established cross-functional teams in each region (Americas, Asia Pacific and EMEA) that are monitoring the situation globally and regionally. These teams, which namely include representatives from Distribution, Portfolio Management, Trading, Technology/Operations, Human Resources, Business Continuity, Compliance, are taking steps to ensure an appropriate and effective response during a highly fluid situation.

We have considered whether there are any financial contingencies and have determined that there are no commitments, contingent liabilities or balances after the reporting period to be disclosed at this stage.

The directors of Invesco Investment Management Limited are actively monitoring the situation and, with the support of the investment manager, continue to manage the Fund's assets within its investment and risk parameters that have been established. The Directors will continue to review the situation in order to navigate through this period of heightened uncertainty.

A new Prospectus was issued on 22 December 2020 to allow the Funds to participate in securities lending.

An Addendum to the Prospectus was issued on 3 March 2021. The addendum should be read in the context of, and together with, the prospectus of the Company dated 22 December 2020. The Prospectus was amended under section Risk Factors to include Sustainability Risk. Also Sustainable Finance was added to Appendix VI.

Brexit

The transition period for the UK's departure from the EU (commonly referred to as Brexit) expired on 31 December 2020. The Manager does not believe that Brexit presents significant issues that cannot be mitigated given that the Funds are domiciled in Ireland and can still passport into Europe (ex UK) and are all currently registered for marketing into the UK under the FCA's Temporary Passporting Regime (TPR). Core counterparties of and service providers to the Company have contingency arrangements available as necessary to ensure that activities can continue with minimal disruption. The Manager has plans to ensure that the Funds will continue to be recognised for sale in the UK once the TPR ends.

The Manager, is part of a global group and has been committed for many years to meeting clients' needs across Europe in both EU and non-EU countries. The change in the UK's status from an EU to a non-EU country has not changed the group's focus or commitment to serve its clients across Europe. The Manager is monitoring developments closely, through a Brexit Steering Committee, to ensure that the impact on clients and the Company is minimal.

Apart from the above there were no other significant events during the financial period that require disclosure in the financial statements.

14. Significant Events after the financial period end date
