IMPORTANT INFORMATION

Suitability of Investment

You should inform yourself as to (a) the possible tax consequences, (b) the legal and regulatory requirements, (c) any foreign exchange restrictions or exchange control requirements and (d) any other requisite governmental or other consents or formalities which you might encounter under the laws of the country of your citizenship, residence or domicile and which might be relevant to your purchase, holding or disposal of the Shares.

The Shares are not principal protected. The value of the Shares may go up or down and you may not get back the amount you have invested. See the section headed "Risk Factors" of the Prospectus and the section headed "Other Information – Risk Factors" of this Supplement for a discussion of certain risks that should be considered by you.

In addition to investing in transferable securities, the Company may invest on behalf of the Fund in financial derivative instruments ("FDIs"), where applicable.

The Fund's Shares purchased on the secondary market cannot usually be sold directly back to the Fund. Investors must buy and sell Shares on a secondary market with the assistance of an intermediary (e.g. a stockbroker) and may incur fees for doing so. In addition, investors may pay more than the current net asset value when buying Shares and may receive less than the current net asset value when selling them.

Certain risks attached to investments in FDIs are set out in the Prospectus under "Risk Factors".

An investment in the Shares is only suitable for you if you (either alone or with the help of an appropriate financial or other advisor) are able to assess the merits and risks of such an investment and have sufficient resources to be able to bear any losses that may result from such an investment. The contents of this document are not intended to contain and should not be regarded as containing advice relating to legal, taxation, investment or any other matters.

Profile of a typical investor

A typical investor would be one who is a private or institutional investor and is seeking capital appreciation over the long term. Such an investor is also one that is able to assess the merits and risks of an investment in the Shares.

Responsibility

The Directors accept responsibility for the information contained in the Prospectus and this Supplement. To the best of the knowledge and belief of the Directors (who have taken all reasonable care to ensure that such is the case) the information contained in this Supplement when read together with the Prospectus (as complemented, modified or supplemented by this Supplement) is in accordance with the facts as at the date of this Supplement and does not omit anything likely to affect the importance of such information.

General

This Supplement sets out information in relation to the Shares and the Fund. You must also refer to the Prospectus which is separate to this document and describes the Company and provides general information about offers of shares in the Company. You should not take any action in respect of the Shares unless you have received a copy of the Prospectus. Should there be any inconsistency between the contents of the Prospectus and this Supplement, the contents of this Supplement will, to the extent of any such inconsistency, prevail. This Supplement and the Prospectus should both be carefully read in their entirety before any investment decision with respect to Shares is made.

As at the date of this document, the Fund has no loan capital (including term loans) outstanding or created but unissued, nor any outstanding mortgages, charges or other borrowings or indebtedness in the nature of borrowings, including bank overdrafts and liabilities under acceptances or acceptance credits, hire purchase or finance lease commitments, or guarantees or other contingent liabilities.

Distribution of this Supplement and Selling Restrictions

Distribution of this Supplement is not authorised unless accompanied by a copy of the Prospectus and the latest annual report and audited accounts of the Company and the Fund (other than to prior recipients of the Prospectus) and if published after such report, a copy of the then latest semi-annual report and unaudited accounts. The distribution of this Supplement and the offering or purchase of the Shares may be restricted in certain jurisdictions. If you receive a copy of this Supplement and/or the Prospectus you may not treat such document(s) as constituting an offer, invitation or solicitation to you to subscribe for any Shares unless, in the relevant jurisdiction, such an offer, invitation or solicitation could lawfully be made to you without compliance with any registration or other legal requirement other than those with which the Company has already complied. If you wish to apply for the opportunity to purchase any Shares, it is your duty to inform yourself of, and to observe, all applicable laws and regulations of any relevant jurisdiction. In particular, you should inform yourself as to the legal requirements of so applying, and any applicable exchange control regulations and taxes in the countries of your respective citizenship, residence or domicile.

Definitions

Words and expressions defined in the Prospectus will, unless otherwise defined in this Supplement, have the same meaning when used in this Supplement.

TERMS OF THE SHARES REPRESENTING INTERESTS IN THE FUND

Investment Objective of the Fund

The investment objective of the Fund is to achieve the total return performance of the Bloomberg MSCI Euro Liquid Corporate ESG Weighted Bond Index (the "**Reference Index**") less fees, expenses and transaction costs.

Investment Policy of the Fund

In order to achieve the investment objective, the Company will employ a sampling strategy ("**Sampling Strategy**"), which includes the use of quantitative analysis, to select securities from the Reference Index using factors such as the index weighted average duration and credit quality.

Where consistent with its investment objective, and in conjunction with the use of a Sampling Strategy the Fund may also hold some securities which are not component securities of the Reference Index, but are of a similar nature to them and whose risk and return characteristics either (a) closely resemble the risk, return and ESG characteristics of constituents of the Reference Index or the Reference Index as a whole, (b) whose addition improves the quality of the replication of the Reference Index, or (c) whose future inclusion into the Reference Index is anticipated. The level of sampling will vary over the life of the Fund depending on asset levels of the Fund, as certain asset

levels may make replication uneconomical or impractical, and the nature of the components of the Reference Index. It is generally expected that the Fund will hold less than the total number of securities in the Reference Index however, the Investment Manager reserves the right to hold as many securities as it believes necessary to achieve the Fund's investment objective.

Further information in relation to how the Fund will seek to track the Reference Index is set out in section 4 "**Investment Objective and Policies**" of the Prospectus.

The Fund may hold ancillary liquid assets and use efficient portfolio management techniques in accordance with the requirements of the Central Bank.

The Fund may also engage in transactions in FDIs for hedging and/or efficient portfolio management purposes. The Fund may use the following FDIs listed on a Market or traded OTC, as applicable: options and futures transactions, forward contracts, non-deliverable forwards, spot foreign exchange transactions and contracts for difference. Further details on FDIs and how they may be used are contained in the main part of the Prospectus under "**Appendix III - Use Of Financial Derivative Instruments And Efficient Portfolio Management**".

The Fund shall not invest more than 10% of its net assets in other UCITS or other open or closed ended CIS.

With the exception of permitted investment in unlisted securities or in units of open-ended CIS, investment will be limited to the stock exchanges and regulated markets set out in Appendix I of the Prospectus.

Further information relevant to the Fund's investment policy is contained in the main part of the Prospectus under "**Investment Objectives & Policies**" and under "**Investment Restrictions**".

Transparency of the Promotion of Environmental or Social Characteristics

The Fund is an Article 8 Fund (as defined in the Prospectus).

The environmental and social characteristics promoted by the Fund are to gain exposure to issuers demonstrating a robust ESG (environmental, social and governance) profile, i.e. issuers with limited/no involvement in certain business activities, with a more favourable ESG rating compared to similar issuers and with no involvement in severe ESG controversies, each as detailed below. The Fund achieves this by tracking the Reference Index, which has a methodology that is consistent with attaining the environmental and social characteristic promoted by the Fund.

The environmental and social characteristics are achieved by applying the Index Provider's exclusion criteria to the eligible securities and by using an ESG rating to tilt the weightings of the eligible securities in the Reference Index away from a traditional market cap weighting by increasing the weights of securities with more favourable ESG ratings. Further information on how the environmental and social characteristics promoted by the Fund are achieved is set out under the heading "**General Description of the Reference Index**" below.

Further details on the transparency of the promotion of ESG characteristics are contained in the Prospectus under "**Appendix IV - Sustainable Finance**".

The Fund generally expects to invest a proportion of its assets in sustainable investments in economic activities that contribute to the environmental objectives of climate change mitigation and climate change adaptation which may be eligible to be assessed for alignment with Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment (the "**Taxonomy Regulation**").

However, as of the date of this Supplement, due to the absence of finalised regulatory technical standards and appropriate and verifiable data to measure sustainable investments and their alignment with the environmental objectives under the Taxonomy Regulations, it is not possible for the Manager to determine the degree of alignment of the investments with the Taxonomy Regulation. Therefore, the investments underlying the Fund do not take into account the EU criteria for environmentally sustainable economic activities as defined in the Taxonomy Regulation. As such, the "do no significant harm" principle does not apply to the investments underlying the Fund.

The Manager will monitor if the required data to measure the Fund's alignment with the environmental objectives under the Taxonomy Regulation becomes available and the Supplement will be updated when the Manager is satisfied that it can determine the degree of alignment.

Index Tracking Strategy

The Manager aims to keep the "Tracking Error" of the Fund (being the standard deviation of the difference in returns between the Fund and the Reference Index) between 0.10% and 1% under normal market conditions. However, exceptional circumstances may arise which cause the Fund's Tracking Error to exceed 1%.

Investment Restrictions of the Fund

Investors in particular must note that the general investment restrictions set out under "**Investment Restrictions**" in the Prospectus apply to the Fund.

Efficient Portfolio Management

Further information on efficient portfolio management is contained in the main body of the Prospectus under the heading "**Use of Financial Derivative Instruments and Efficient Portfolio Management**".

Securities Financing Transactions and Swaps

The Fund may use certain '*securities financing transactions*', as defined in Regulation 2015/2365 on transparency of securities financing transactions and of reuse and amending Regulation (EU) No 648/2012 ("**SFTR**"), ("**Securities Financing Transactions**"), namely securities lending. The Fund's use of Securities Financing Transactions will be subject to the requirements of SFTR and in accordance with normal market practice, the Central Bank Regulations and any other statutory instrument, regulations, rules, conditions, notices, requirements or guidance of the Central Bank issued from time to time applicable to the Company pursuant to the Regulations ("**Central Bank Rules**"). Such Securities Financing Transactions may be entered into for any purpose that is consistent with the investment objective of the Fund, including to generate income or profits in order to increase portfolio returns or to reduce portfolio expenses or risks. Securities lending will be for efficient portfolio management purposes only.

The type of assets that may be held by the Fund in accordance with its investment objective and policies and may be subject to such Securities Financing Transactions are bonds. The maximum proportion of the Fund's assets that may be subject to securities lending is 100%, however the Fund does not currently plan to carry out any securities lending and therefore the expected proportion of the Fund's assets that may be subject to securities lending is 0%.

Securities lending means transactions by which one party transfers securities to the other party subject to a commitment that the other party will return equivalent securities on a future date or when requested to do so by the party transferring the securities, that transaction being considered as securities lending for the party transferring the securities.

All the revenues arising from Securities Financing Transactions and any other efficient portfolio management techniques shall be returned to the Fund following the deduction of any direct and indirect operational costs and fees arising. Such direct and indirect operational costs and fees (which are all fully transparent), which shall not include hidden revenue, shall include fees and expenses payable to securities lending agents engaged by the Company from time to time. Such fees and expenses of any securities lending agents engaged by the Company, which will be at normal commercial rates together with VAT, if any, thereon, will be borne by the Company or the Fund in respect of which the relevant party has been engaged. Details of Fund revenues arising and attendant direct and indirect operational costs and fees as well as the identity of any securities lending agents engaged by the Company from time to time shall be included in the Company's semi-annual and annual reports.

The types of acceptable counterparty and the diversification requirements are explained in Appendix III of the Prospectus. A Fund may only enter into Securities Financing Transactions with counterparties that have been selected and assessed in accordance with the Central Bank Rules. The acceptable counterparties will be entities with legal personality and located in OECD jurisdictions. They will be subject to ongoing supervision by a public authority, be financially sound and have the necessary

organisational structure and resources for the relevant type of transaction.

From time to time, the Fund may engage securities lending agents that are related parties to the Depositary or other service providers of the Company. Such engagement may on occasion cause a conflict of interest with the role of the Depositary or other service provider in respect of the Company. Please refer to Prospectus section "**Potential Conflicts of Interest**" for further details on the conditions applicable to any such related party transactions. The identity of any such related parties will be specifically identified in the Company's semi-annual and annual reports.

Please refer to the "**Risk Factors**" sections in respect of the risks related to Securities Financing Transactions. The risks arising from the use of Securities Financing Transactions shall be adequately captured in the Company's risk management process.

The assets of a Fund that are subject to SFTs and any collateral received are held by the Depositary or its agent.

The Fund will not enter into repurchase and/or reverse repurchase agreements or Swaps.

Currency Hedging Policy

The Fund may enter into transactions for the purposes of hedging the foreign exchange exposure in any hedged Share Classes (identified by "Hdg" in their names). The purpose of the hedging in the hedged Share Classes is to limit, at a Share Class level, the profit or loss generated from foreign exchange exposure when holding an asset in a currency other than the Base Currency of the Fund. This is achieved by the hedged Share Classes employing 30 day rolling forward FX contracts.

All costs and losses arising in relation to such currency hedging transactions will be borne by the hedged Share Class and all gains arising in connection with such hedging transactions will be attributable to the relevant Share Class. Although the Fund may utilise currency hedging transactions in respect of Share Classes, it shall not be obliged to do so and to the extent that it does employ strategies aimed at hedging certain Share Classes, there can be no assurance that such strategies will be effective. The costs and related liabilities/benefits arising from instruments entered into for the purposes of hedging the currency exposure for the benefit of any particular Share Class of the Fund (where the currency of a particular Share Class is different to the Base Currency of the Fund) shall be attributable exclusively to the Share Class. Under exceptional circumstances, such as, but not limited to, where it is reasonably expected that the cost of performing the hedge will be in excess of the benefit derived and therefore detrimental to Shareholders, the Company may decide not to hedge the currency exposure of such Share Classes.

Where the Investment Manager seeks to hedge against currency fluctuations, while not intended, this could result in over-hedged or under-hedged positions due to external factors outside the control of the Company. However, over-hedged positions will not exceed 105% of the Net Asset Value of the relevant Share Class and hedged positions will be kept under review to ensure that over-hedged positions do not exceed the permitted level and that under-hedged positions do not fall short of 95% of the portion of the Net Asset Value of the relevant Share Class. This review will also incorporate a procedure to ensure that positions in excess of 100% of Net Asset Value will not be carried forward from month to month.

Further information on currency hedging at Share Class level is contained in the main body of the Prospectus under the heading "**Hedged Classes**".

Collateral Policy

- (a) **Non-Cash Collateral:** In addition to the requirements for valuation of non-cash collateral in the Prospectus, subject to any agreement on valuation made with the counterparty, collateral posted to a recipient counterparty for the benefit of the Fund will be valued daily at mark-to-market value.
- (b) **Issuer Credit Quality:** In addition to the requirement for Issuer Credit Quality set out in the Prospectus, assets provided by the Fund on a title transfer basis shall no longer belong to the Fund and shall pass outside the custodial network. The counterparty may use those assets at its absolute discretion. Assets provided to a counterparty other than on a title transfer basis shall be held by the Depositary or a duly appointed sub-depositary.

Further information on the criteria which collateral received by the Fund must meet is

contained in the main body of the Prospectus under the heading "**Non-Cash Collateral**".

- (c) Collateral - Posted by the Fund: In addition to the requirements in respect of collateral posted to a counterparty in the Prospectus, collateral posted to a counterparty by or on behalf of the Fund will consist of such collateral as is agreed with the counterparty from time to time and may include any types of assets held by the Fund.
- (d) Valuation: Information in respect of the collateral valuation methodology used by the Company can be found in the Prospectus under the heading "**Appendix III - Use Of Financial Derivative Instruments And Efficient Portfolio Management**". The rationale for the use of this collateral valuation methodology is primarily to guard against the price volatility of assets being received by the Fund as collateral.

The risk exposure of the Fund to counterparties will remain within the limits prescribed in the Prospectus under "**Appendix II - Investment Restrictions Applicable to the Funds under the Regulations**".

Further information on the collateral policy is contained in the main body of the Prospectus under the heading "**Collateral Policy**".

Borrowing and Leverage

The Company on behalf of the Fund may borrow up to 10% of the Net Asset Value of the Fund on a temporary basis. Such borrowings may only be used for short term liquidity purposes to cover the redemption of Shares. Further information on Borrowing and Leverage is contained in the main body of the Prospectus under the heading "**Borrowing and Lending Powers**" and "**Leverage**" respectively.

The Company will use the commitment approach for the purposes of calculating global exposure for the Fund. The Fund's total exposure to the Reference Index will be limited to 100% of Net Asset Value.

While it is not the Investment Manager's intention to leverage the Fund, any leverage resulting from the use of FDIs will be done in accordance with the Regulations.

Dividend Policy

Dividends will be declared on a quarterly basis for the Dist Shares, the USD Hdg Dist Shares, the GBP Hdg Dist Shares, the CHF Hdg Dist Shares, the MXN Hdg Dist Shares and the SEK Hdg Dist Shares in accordance with the general provisions set out in the Prospectus under the heading "**Dividend Policy**" and Shareholders will be notified in advance of the date on which dividends will be paid. Distributions will not be made in respect of the Acc Shares, the USD Hdg Acc Shares, the GBP Hdg Acc Shares the CHF Hdg Acc Shares, the MXN Hdg Acc Shares and the SEK Hdg Acc Shares and income and other profits will be accumulated and reinvested.

Trading

Application will be made to the Deutsche Boerse and/or such other exchanges as the Directors may determine from time to time (the "**Relevant Stock Exchanges**") for listing and/or admission to trading of the Shares issued and available to be issued on the main market of each of the Relevant Stock Exchanges on or about the Launch Date. This Supplement and the Prospectus together comprise listing particulars for the purposes of trading on the main market of each of the Relevant Stock Exchanges.

Exchange Traded Fund

The Fund is an Exchange Traded Fund ("**ETF**"). The Shares of this Fund are fully transferable among investors and will be listed and/or traded on the Relevant Stock Exchanges. It is envisaged that Shares will be bought and sold by private and institutional investors in the secondary market in the same way as the ordinary shares of a listed trading company.

Intra-Day Portfolio Value ("iNAV")

Further information on intra-day portfolio value is contained in the main body of the Prospectus under the heading "**Intra-Day Portfolio Value**".

Fees and Expenses

The following fees will be incurred on each Share by Shareholders (which accordingly will not be incurred by the Company on behalf the Fund and will not affect the Net Asset Value of the Fund):

Share Class	All Share Classes
Subscription Charge	Up to 5%
Redemption Charge	Up to 3%

The Subscription Charge is deducted from the investment amount received from an investor for subscription for Shares. Such Subscription Charge is payable to the Manager.

The following fees and expenses will be incurred by the Company on behalf of the Fund and will affect the Net Asset Value of the relevant Share Class of the Fund.

Share Class	"Acc"
Management Fee	Up to 0.10% per annum or such lower amount as may be advised to Shareholders from time to time.

----------------	---

Share Class	"SEK Hdg Dist"
Management Fee	Up to 0.12% per annum or such lower amount as may be advised to Shareholders from time to time.

The Management Fee, a percentage of the Net Asset Value of the relevant Class of Shares (plus VAT, if any), is payable by the Company out of the Fund Assets to the Manager. The Management Fee will accrue on each day and will be calculated on each Dealing Day and paid monthly in arrears. The Manager will pay out of its fees (and not out of the assets of the Fund) the fees and expenses (where appropriate) of the Investment Manager, the Administrator, the Depositary, the Directors and the ordinary fees, expenses and costs incurred by the Fund that include Setting Up Costs and Other Administrative Expenses as described in the Prospectus.

Where a distribution fee, commission or other monetary benefit is received by the Fund, the Manager or any person acting on behalf of the Fund or the Manager of the Fund, the fee, commission or other monetary benefit shall be paid into the assets of the Fund.

Dilution Levy: The Fund will not apply a dilution levy.

This section headed "**Fees and Expenses**" should be read in conjunction with the section headed "**Fees and Expenses**" in the Prospectus.

GENERAL DESCRIPTION OF THE REFERENCE INDEX

The Reference Index is designed to reflect the performance of EUR-denominated investment grade, fixed-rate, taxable debt securities issued by corporate issuers adjusted based upon certain environmental, social and governance ("**ESG**") metrics, which seek to increase overall exposure to those issuers demonstrating a robust ESG profile. The Reference Index includes publicly issued securities by industrial, utility and financial institution issuers in global and regional markets.

The Reference Index is further described below but only represents an extract of information available from public sources and neither the Directors, the Manager, Bloomberg or its affiliates or such other successor sponsor to the Reference Index (the "**Index Provider**") nor the Investment Manager take any responsibility for the accuracy or completeness of such information.

To be eligible for inclusion in the Reference Index, eligible securities' principal and interest must be denominated in EUR. The securities which comprise the Reference Index must be rated investment grade (Baa3/BBB-/BBB- or higher) using the middle rating of Moody's, S&P and Fitch; When a rating from only two agencies is available, the lower is used; When only one agency rates a bond, that rating is used. In cases where explicit bond level ratings may not be available, other sources may be used to classify securities by credit quality.

To be eligible for inclusion in the Reference Index, bonds must have €500 million minimum par amount outstanding. Bonds must have fixed-rate coupon issues and at least one year to final maturity regardless of optionality. Callable bonds are eligible for inclusion; callable bonds that convert fixed to floating rate, including fixed-to-float perpetual, are included during their fixed-rate term only and will exit the index one year prior to conversion to floating-rate. Fixed-rate perpetual bonds are not included. Only fully taxable issues are eligible for inclusion. Senior and subordinated issues are eligible for inclusion.

Securities are excluded that according to the Index Provider's exclusionary criteria: 1) have faced very

severe controversies pertaining to ESG issues (including UN Global Compact violations) over the last three years; or 2) are involved, as per the Bloomberg MSCI screens, in any of the following business activities: controversial weapons, conventional weapons, nuclear weapons, oil sands, thermal coal, tobacco and firearms; or 3) are issued by emerging market issuers.

Each of the eligible component securities is then assigned an ESG rating using MSCI ESG metrics. The Index Provider's ESG scoring methodology assesses each eligible issuer based on the Index Provider's proprietary rating framework and assigns an ESG rating to each eligible issuer on a scale from AAA (the highest rate) to CCC (the lowest rated) or NR (not rated). This ESG rating is then applied to re-weight the eligible securities from their natural weights as a result of the notional size of the bond, to construct the weighting of the Reference Index (i.e. the weight of each security is adjusted by a fixed multiplier which is determined by the issuer's ESG rating). Details of the fixed multiplier for each ESG rating is set out in the methodology for the Reference Index on the Index Provider's website.

MSCI ESG metrics is a tool designed to produce a broad set of standardised ESG data and simple flagged metrics that are comparable across a broad universe of companies and used to assess the ESG profile of a company. ESG metrics cover risk exposure, controversies, performances and practices and take the following areas into account: climate change, natural capital, pollution and waste, environmental opportunities, human capital, product liability, stakeholder opposition and corporate behaviour.

Security types excluded from the Reference Index include: treasuries, government-related bonds, securitised and covered bonds, contingent capital securities (including traditional CoCos and contingent write-down securities, with explicit capital ratio or solvency/balance sheet-based triggers), bonds with equity type features (e.g. warrants, convertibles, preferreds), inflation-linked bonds, floating-rate issues, private placements, retail bonds and structured notes.

Index Rebalancing

The Reference Index rebalances monthly.

The Fund may choose, but is not obliged to, to rebalance in line with the Reference Index and will bear the costs of any rebalancing trades (i.e. the costs of buying and selling securities of the Reference Index and associated taxes and transaction costs).

Index Provider and Website

The Reference Index is sponsored by Bloomberg and more details on the Reference Index can be found at <https://www.bloomberg.com/professional/product/indices/bloomberg-msci-esg-indices/>.

Publication

The level of the Reference Index will be published on <https://www.bloombergindices.com/>.

OTHER INFORMATION

Taxation

The tax treatment of the Company is set out in the Prospectus of the Company and the tax information provided therein is based on tax law and practice as at the date of the Prospectus.

Shareholders and potential investors are advised to consult their professional advisers concerning possible taxation or other consequences of purchasing, holding, selling or otherwise disposing of the Shares under the laws of their country of incorporation, establishment, citizenship, residence or domicile.

Consequences of Disruption Events

Upon the occurrence of a Disruption Event (and without limitation to the Directors personal powers as further described in the Prospectus) an Approved Counterparty may make adjustments to determine

the valuation of FDIs. Further information on the consequences of Disruption Events is contained in the main body of the Prospectus under the heading "**Disruption Events**".

Limited Recourse

A Shareholder will solely be entitled to look to the assets of the Fund in respect of all payments in respect of its Shares. If the realised net assets of the Fund are insufficient to pay any amounts payable in respect of the Shares, the Shareholder will have no further right of payment in respect of such Shares nor any claim against or recourse to any of the assets of any other Fund or any other asset of the Company.

Risk Factors

Certain risks relating to the Shares are set out under the heading "**Risk Factors**" in the Prospectus, including 'Concentration Risk'. In addition, Shareholders must also note that:

- (a) **Sampling Risk:** The Fund's use of a representative sampling approach will result in it holding a smaller number of securities than are in the underlying index. As a result, an adverse development to an issuer of securities that the Fund holds could result in a greater decline in NAV than would be the case if the Fund held all of the securities in the underlying index. To the extent the assets in the Fund are smaller, these risks will be greater.
- (b) **Risks associated with investment in debt securities:** Investment in debt securities is subject to interest rate, liquidity and credit risks. Lower-rated securities will usually offer higher yields than higher-rated securities to compensate for the reduced creditworthiness and increased risk of default that these securities carry. Lower-rated securities generally tend to reflect short-term corporate and market developments to a greater extent than higher-rated securities which respond primarily to fluctuations in the general level of interest rates. There are fewer investors in lower-rated securities and it may be harder to buy and sell such securities at an optimum time. Credit risk is the risk of loss on an investment due to the deterioration of an issuer's financial standing. Such a deterioration may result in a reduction of the credit rating of the issuer's securities and may lead to the issuer's inability to honour its contractual obligations, including making timely payment of interest and principal. Credit ratings are a measure of credit quality. Although a downgrade or upgrade of an Investment's credit ratings may or may not affect its price, a decline in credit quality may make the Investment less attractive, thereby driving its yield up and its price down. Declines in credit quality can result in bankruptcy for the issuer and permanent loss of investment. In the event of a bankruptcy or other default, the Fund could experience both delays in liquidating the underlying securities and losses including a possible decline in value of the underlying securities during the period when a Fund seeks to enforce its rights thereto. This will have the effect of reducing levels of capital and income in the Fund and lack of access to income during this period together with the expense of enforcing the Fund's rights. Investment in debt securities will be subject to interest rate risk. Interest rate risk refers to the risk that the prices of debt securities generally fall as interest rates rise; conversely, debt securities prices generally rise as interest rates fall. Specific debt securities differ in their sensitivity to changes in interest rates depending on specific characteristics of each debt security. Longer term debt securities are usually more sensitive to interest rate changes.
- (c) **Liquidity Risk:** The Fund's investments may be subject to liquidity constraints, which means they may trade less frequently and in small volumes. Securities of certain types, such as bonds, may also be subject to periods of significantly lower liquidity in difficult market conditions. As a result, changes in the value of investments may be more unpredictable. In certain cases, it may not be possible to sell the security at the price at which it has been valued for the purposes of calculating the Net Asset Value of the Fund or at a value considered to be fairest. In addition, there is a risk that bonds which are nearing maturity may become illiquid. In such cases, it may become more difficult to achieve fair value on the purchase and sale thereof.
- (d) **Environmental, Social and Governance Risk:** The Fund intends to invest in securities of issuers that manage their ESG exposures better relative to their peers. This may affect the Fund's exposure to certain issuers and cause the Fund to forego certain investment opportunities. The Fund may perform differently to other funds, including underperforming other funds that do not

seek to invest in securities of issuers based on their ESG ratings.

Investors should also refer to the Prospectus for additional disclosure of risks and conflicts of interest.
