# Director's Report

## Annual Report and Audited Financial Statements 2013

The Directors' present their annual report and audited financial statements of Source Commodity Markets Plc (the "Company"), for the year ended 31 December 2013.

### Principal activities

Source Commodity Markets Plc (the "Company") is a public limited liability company, incorporated on 15 October 2008 in Ireland under the Companies Acts, 1963 to 2013 and has established the T-Bill Secured ETC Programme pursuant to which the Company may, from time to time, issue secured exchange traded commodity linked certificates (the "Certificates") on the terms set out in the prospectus and final terms in respect of the relevant Certificates. The aggregate number of Certificates outstanding under the Programme will not at any time exceed 5,000,000,000.

The Certificates are exchange-traded securities designed to replicate the performance of the commodity index specified in the relevant Final Terms (the "Commodity Index") as closely as possible. The Certificates are in bearer form and issued in Series (each "Series"). Certificates of each Series are secured, limited recourse obligations of the Company which rank equally among themselves. The net issuance proceeds of each Series were used to purchase the US Treasury Bills comprising the collateral for such Series and to enter into derivative contracts to enable tracking of the relevant Commodity Index.

Upon each further issuance of Certificates of a Series, the issue proceeds are used to acquire additional assets as collateral for such further issuance of Certificates. Certificates may be sold to any one or more of Goldman Sachs International, Morgan Stanley & Co. International Plc, JP Morgan and Merrill Lynch International (each an 'Authorised Participant' under the terms of the authorised participant agreements or such other authorised participants as may be appointed from time to time).

The Certificates of Series 1, 7, 9, 11 and 23 are listed on both the Irish Stock Exchange and Frankfurt Stock Exchange. The Certificates of Series 25 is listed on Irish Stock Exchange, Frankfurt Stock Exchange and Six Swiss Exchange. The Certificates of Series 28 is listed on the Six Swiss Exchange.

### Business review and key performance indicators

During the year,

- the Company did not issue any new Series (2012: Series 28 - Brent Crude Oil Enhanced Total Return Index Linked Certificates)
- the Company redeemed the following Series:
  - Series 2 – S&P GSCI Total Return Index Linked Certificates
  - Series 4 – Corn Total Return Index Linked Certificates
  - Series 10 – Grains Total Return Index Linked Certificates

Series 13 – Natural gas Total Return Index Linked Certificates

Series 15 – Precious metals Total Return Index Linked Certificates

Series 16 – Silver Total Return Index Linked Certificates

Series 17 – Softs Total Return Index Linked Certificates

Series 18 – Soybeans Total Return Index Linked Certificates

Series 19 – Sugar Total Return Index Linked Certificates

Series 20 – Wheat Total Return Index Linked Certificates

Series 21 – Light energy Total Return Index Linked Certificates

Series 24 – Aluminium Total Return Index Linked Certificates

Series 25 – Brent Crude Oil Enhanced Total Return Index Linked Certificates

- the Company made a profit of USD nil (2012: USD 475);
- the net loss on derivative financial instruments amounted to USD 1,289,074 (2012: net gain of USD 363,395);
- the net loss on financial assets designated at fair value through profit or loss amounted to USD 14,859 (2012: net gain of USD 29,940);
- the net gain on financial liabilities designated at fair value through profit or loss amounted to USD 20,999,235 (2012: net loss of USD 978,216);
- the net swap expense amounted to USD 19,210,190 (2012: net swap income of USD 1,542,802);

# Annual Report and Audited Financial Statements 2013

## Business review and key performance indicators (continued)

- the total amount of Certificates issued during the year was USD 64,616,574 (2012: USD 238,477,883) within the existing Series;
- the total amount of Certificates redeemed during the year was USD 207,376,052 (2012: USD 222,270,635) within the existing Series;
- the total amount of US Treasury Bills acquired during the year was USD 518,665,673 (2012: USD 1,100,446,997) within the existing Series;
- the total amount of US Treasury Bills disposed during the year was USD 679,454,799 (2012: USD 1,084,759,450) within the existing Series;
- the financial assets designated at fair value through profit or loss decreased by 80% compared to the year ended 31 December 2012 (2012: increase of 8%);
- the financial liabilities designated at fair value through profit or loss decreased by 80% compared to the year ended 31 December 2012 (2012: increase of 9%); and
- the investments continued to perform in accordance with their objectives.

As at 31 December 2013,

- the Company's total Certificates' indebtedness was USD 40,679,760 (2012: USD 204,438,473);

- the net assets was USD 69,640 (2012: USD 69,640); and
- the total nominal amount of the US Treasury Bills was USD 41,047,000 (2012: USD 201,858,000).

## Future developments

The Directors expect the present level of activity to be sustained for the foreseeable future.

## Results and dividends for the year and state of affairs at 31 December 2013

The results for the year are set out on page 8. No dividends are recommended by the Directors for the year under review (2012: Nil).

## Risk and uncertainties

The Company is subject to various risks. The principal risks facing the Company are outlined in note 21 to the financial statements.

## Directors, secretary and their interests

The Directors and secretary who held office on 31 December 2013 did not hold any shares in the Company at that date, or during the year with the exception of David McGuinness, Rhys Owens and Eimir McGrath who held 1 share during their appointment as alternate directors.

## Related party disclosures

The related party transactions are disclosed in note 20 to the financial statements.

## Credit events

There were no credit events noted during the year.

## Changes in directors, registered office or secretary

Eimir McGrath resigned as alternate director to Margaret Kennedy on 2 April 2013. On 7 October 2013, Rhys Owens was appointed as alternate director to Conor Blake and resigned on the same date. David McGuinness was appointed on 10 January 2014 as alternate director to Margaret Kennedy and resigned on the same date. Adrian Bailie was appointed as alternate director to Margaret Kennedy on 15 April 2014. There have been no other changes in Directors or registered office or secretary during the year.

## Corporate governance statement

### Introduction

The Company is subject to and complies with Irish Statute comprising the Companies Acts, 1963 to 2013, the Listing rules of the Irish Stock Exchange, Six Swiss Stock Exchange and Frankfurt Stock Exchange. The European Communities (Directive 2006/46/EC) Regulations (S.I. 450 of 2009 and S.I. 83 of 2010) (the "Regulations"). The Company does not apply additional requirements in addition to those required by the above. Each of the service providers engaged by the Company is subject to their own corporate governance requirements.

### Financial Reporting Process

The Board of Directors (the "Board") is responsible for establishing and maintaining adequate internal control and risk management systems of the Company in relation to the financial reporting process. Such systems are designed to manage rather than eliminate the risk of failure to achieve the Company's financial reporting objectives and can only provide reasonable and not absolute assurance against material misstatement or loss.

# Annual Report and Audited Financial Statements 2013

## Corporate governance statement (continued) Financial Reporting Process (continued)

The Board has established processes regarding internal control and risk management systems to ensure its effective oversight of the financial reporting process. These include appointing the Administrator, Deutsche International Corporate Services (Ireland) Limited, to maintain the accounting records of the Company independently of Source UK Services Limited (the "Arranger") and Wells Fargo Bank, N.A. (the "Custodian"). The Administrator is contractually obliged to maintain proper books and records as required by the Corporate Administration agreement.

To that end, the Administrator performs reconciliations of its records to those of the Arranger and the Custodian. The Administrator is also contractually obliged to prepare for review and approval by the Board the annual report including financial statements intended to give a true and fair view.

The Board evaluates and discusses significant accounting and reporting issues as the need arises. From time to time, the Board also examines and evaluates the Administrator's financial accounting and reporting routines and monitors and evaluates the external auditors' performance, qualifications and independence. The Administrator has operating responsibility for internal control in relation to the financial reporting process and the Administrator's report to the Board.

## Risk assessment

The Board is responsible for assessing the risk of irregularities whether caused by fraud or error in financial reporting and ensuring the processes are in place for the timely identification of internal and external matters with a potential effect on financial reporting. By appointing Deutsche International Corporate Services (Ireland) Limited, the Board ensures that processes are put in place to identify changes in accounting rules and recommendations and to ensure that these changes are accurately reflected in the Company's financial statements. More specifically;

- The Administrator has a review procedure in place to ensure errors and omissions in the financial statements are identified and corrected.
- Regular training on accounting rules and recommendations is provided to the accountants employed by the Administrator.
- Accounting bulletins, issued by Deutsche Bank AG, London, an entity related to Deutsche International Corporate Services (Ireland) Limited, are distributed monthly to all accountants employed by the Administrator.

## Control Activities

The Administrator is contractually obliged to design and maintain control structures to manage the risks which the Board judges to be significant for internal control over financial reporting.

These control structures include appropriate division of responsibilities and specific control activities aimed at detecting or preventing the risk of significant deficiencies in financial reporting for every significant account in the financial statements and the related notes in the Company's annual report.

## Monitoring

The Board has an annual process to ensure that appropriate measures are taken to consider and address the shortcomings identified and measures recommended by the independent auditors.

Given the contractual obligations on the Administrator, the Board has concluded that there is currently no need for the Company to have a separate internal audit function in order for the Board to perform effective monitoring and oversight of the internal control and risk management systems of the Company in relation to the financial reporting process.

## Capital Structure

No person has a significant direct or indirect holding of securities in the Company. No person has any special rights of control over the Company's share capital.

There are no restrictions on voting rights.

With regard to the appointment and replacement of Directors, the Company is governed by its Articles of Association, Irish Statute comprising the Companies Acts, 1963 to 2013, the Listing Rules of the Irish Stock Exchange, Six Swiss Exchange and Frankfurt Stock Exchange. The Articles of Association themselves may be amended by special resolution of the shareholders.

# Annual Report and Audited Financial Statements 2013

## Corporate governance statement (continued)

### Powers of Directors

The Board is responsible for managing the business affairs of the Company in accordance with the Articles of Association. The Directors may delegate certain functions to the Administrator and other parties, subject to the supervision and direction by the Directors. The Directors have delegated the day to day administration of the Company to the Administrator. The Directors cannot issue or buy back the shares of the Company.

### Audit committee

Statutory audits in Ireland are regulated by the European Communities Regulations, 2010 (S.I. 220 of 2010). According to the regulations, if the sole business of the Irish SPV relates to the issuing of asset backed securities, the SPV is exempt from the requirement to establish an audit committee (under Regulation 91(9) (d) of the Regulations). In this respect, the Company is not required to establish an audit committee.

### Accounting records

The Directors believe that they have complied with the requirements of Section 202 of the Companies Act, 1990 with regard to the books of account by employing accounting personnel with the appropriate expertise. The books of accounts of the Company are maintained at 5 Harbourmaster Place, IFSC, Dublin 1.

### Subsequent events

There have been no significant event since the year end up to the date of signing this report that requires disclosure in the financial statements.

### Independent auditor

In accordance with Section 160(2) of the Companies Act, 1963 to 2013, PricewaterhouseCoopers, Chartered Accountants and Registered Auditors has expressed their willingness to continue in office.

On behalf of the board

Conor Blake  
Director

Adrian Bailie  
Alternate director to Margaret Kennedy

Date: 16 April 2014

# Statement of Directors' responsibilities

## Annual Report and Audited Financial Statements 2013

The Directors are responsible for preparing the Directors' report and financial statements, in accordance with applicable law and regulations.

Irish company law requires the Directors to prepare financial statements for each financial year. Under that law the Directors have elected to prepare the Company financial statements in accordance with International Financial Reporting Standards (IFRSs) as adopted by the EU.

The Company's financial statements are required by law and IFRSs as adopted by the EU to present fairly the financial position and performance of the Company. The Companies Acts, 1963 to 2013 provide in relation to such financial statements that references in the relevant parts of those Acts to financial statements giving a true and fair view are references to their achieving a fair presentation.

In preparing the financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state that the financial statements comply with IFRSs as adopted by the EU and in accordance with Companies Acts, 1963 to 2013; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the Company will continue in business.

The Directors are responsible for keeping proper books of account that disclose with reasonable accuracy at any time the financial position of the Company and enable them to ensure that its financial statements comply with the Companies Acts, 1963 to 2013.

They are also responsible for taking such steps as are reasonably open to them to safeguard the assets of the Company and to prevent and detect fraud and other irregularities.

The Directors are also required by the Transparency (Directive 2004/109/EC) Regulation 2007 and the Transparency Rules of the Irish Financial Services Regulatory Authority to include a Directors' report containing a fair review of the business and a description of the principal risks and uncertainties facing the Company.

### Directors' statement pursuant to Transparency Regulations

Each of the Directors, whose name and functions are listed on page 1 of the financial statements confirm that, to the best of each person's knowledge and belief:

- they have complied with the above requirements in preparing the financial statements;
- the financial statements, prepared in accordance with IFRSs as adopted by the EU, give a true and fair view, of the state of the assets, liabilities, financial position and of the profit of the Company for the year then ended; and
- the Directors' report includes a fair review of the development and performance of the business and the financial position of the Company, together with a description of the principal risks and uncertainties that they face.

On behalf of the board

Conor Blake  
Director

Adrian Bailie  
Alternate director to Margaret Kennedy

Date: 16 April 2014

# Independent Auditors' Report to the Members of Source Commodity Markets Plc

We have audited the financial statements of Source Commodity Markets Plc for the year ended 31 December 2013 which comprise the Statement of comprehensive income, the Statement of financial position, the Statement of changes in equity, the Statement of cash flows and the related notes. The financial reporting framework that has been applied in their preparation is Irish law and International Financial Reporting Standards (IFRSs) as adopted by the European Union.

## Respective responsibilities of directors and auditors

As explained more fully in the Directors' Responsibilities Statement set out on page 6, the directors are responsible for the preparation of the financial statements giving a true and fair view. Our responsibility is to audit and express an opinion on the financial statements in accordance with Irish law and International Standards on Auditing (UK and Ireland). Those standards require us to comply with the Auditing Practices Board's Ethical Standards for Auditors.

This report, including the opinions, has been prepared for and only for the company's members as a body in accordance with Section 193 of the Companies Act, 1990 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

## Scope of the audit of the financial statements

An audit involves obtaining evidence about the amounts and disclosures in the financial statements sufficient to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or error. This includes an assessment of: whether the accounting policies are appropriate to the company's circumstances and have been consistently applied and adequately disclosed; the reasonableness of significant accounting estimates made by the directors; and the overall presentation of the financial statements. In addition, we read all the financial and non-financial information in the annual report to identify material inconsistencies with the audited financial statements and to identify any information that is apparently materially incorrect based on, or materially inconsistent with, the knowledge acquired by us in the course of performing the audit. If we become aware of any apparent material misstatements or inconsistencies we consider the implications for our report.

## Opinion on financial statements

In our opinion the financial statements:

- give a true and fair view, in accordance with IFRSs as adopted by the European Union, of the state of the company's affairs as at 31 December 2013 and of its profit and cash flows for the year then ended; and
- have been properly prepared in accordance with the requirements of the Companies Acts 1963 to 2013.

## Matters on which we are required to report by the Companies Acts 1963 to 2013

- We have obtained all the information and explanations which we consider necessary for the purposes of our audit.
- In our opinion proper books of account have been kept by the company.
- The financial statements are in agreement with the books of account.
- In our opinion the information given in the Directors' Report is consistent with the financial statements.
- The net assets of the company, as stated in the Statement of Financial Position, are more than half of the amount of its called-up share capital and, in our opinion, on that basis there did not exist at 31 December 2013 a financial situation which under Section 40 (1) of the Companies (Amendment) Act, 1983 would require the convening of an extraordinary general meeting of the company.

## Matters on which we are required to report by exception

We have nothing to report in respect of the provisions in the Companies Acts 1963 to 2013 which require us to report to you if, in our opinion, the disclosures of directors' remuneration and transactions specified by law are not made.

# Annual Report and Audited Financial Statements 2013

## Notes to the Financial Statements

### 1. General information

Source Commodities Markets Plc (the "Company") is a limited liability company, incorporated on 15 October 2008 in Ireland under the Companies Acts, 1963 to 2013. The Company has established the T-Bill Secured ETC Programme pursuant to which the Company may, from time to time, issue secured exchange traded commodity linked Certificates on the terms set out in the Prospectus and Final Terms in respect of the relevant Certificates. The aggregate number of Certificates outstanding under the Programme will not at any time exceed 5,000,000,000.

The Company has no direct employees.

The Certificates of Series 1, 7, 9, 11 and 23 are listed on both the Irish Stock Exchange and Frankfurt Stock Exchange. The Certificates of Series 25 is listed on Irish Stock Exchange, Frankfurt Stock Exchange and Six Swiss Exchange. The Certificates of Series 28 is listed on the Six Swiss Exchange.

### 2. Basis of preparation

#### (A) Statement of compliance

The financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRSs") and its interpretations as adopted by the EU and as applied in accordance with the Companies Acts 1963 to 2013.

The accounting policies set out below have been applied in preparing the financial statements for the year ended 31 December 2013, the comparative information presented in these financial statements is for year ended 31 December 2012.

These financial statements have been prepared on a going concern basis as defined in the Directors' report.

#### (B) Basis of measurement

The financial statements have been prepared on the historical cost basis except for the following:

- Derivative financial instruments are measured at fair value;
- Financial assets designated at fair value through profit or loss are measured at fair value; and
- Financial liabilities designated at fair value through profit or loss is measured at fair value.

The methods used to measure fair values are discussed further in note 3(b).

#### (C) Functional and presentation currency

The financial statements are presented in US Dollars (USD) which is the Company's functional currency and presentational currency. Functional currency is the currency of the primary economic environment in which the entity operates. The financial liabilities issued are primarily denominated in US Dollars (USD). The Directors of the Company believe that US Dollars (USD) most faithfully represents the economic effects of the underlying transactions, events and conditions.

#### (D) Use of estimates and judgements

The preparation of the financial statements requires management to make judgements, estimates and assumptions that may affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and any future periods affected.

#### Key sources of estimation uncertainty

Information about significant areas of estimation uncertainty and critical judgements in applying accounting policies that have the most significant effect on the amounts recognised in the financial statements are described in notes 3(b) and 21.

#### Determining fair values

The determination of fair value for financial assets and liabilities for which there is no observable market price requires the use of valuation techniques as described in accounting policy 3(b) "Fair value measurement principles" and note 21 to the financial statements. For financial instruments that trade infrequently and have little price transparency, fair value is less objective, and requires varying degrees of judgement depending on liquidity, concentration, uncertainty of market factors, pricing assumptions and other risks affecting the specific instrument.

# Annual Report and Audited Financial Statements 2013

## 2. Basis of preparation (continued)

### (D) Use of estimates and judgements (continued)

Critical accounting judgements in applying the Company's accounting policies

The Company's accounting policy on fair value measurements is discussed under note 3(b) "Financial Instruments". Critical accounting judgements made in applying the Company's accounting policies in relation to valuation of financial instruments are as follows:

#### Valuation of financial instruments

The Company measures fair values using the following hierarchy of methods:

- Quoted market price in an active market for an identical instrument.
- Valuation techniques based on observable inputs. This category includes instruments valued using: quoted market prices in active markets for similar instruments; quoted prices for similar instruments in markets that are considered less than active; or other valuation techniques where all significant inputs are directly or indirectly observable from market data.
- Valuation techniques using significant unobservable inputs. This category includes all instruments where the valuation technique includes inputs not based on observable data and the unobservable inputs could have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments where significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

## 3. Significant accounting policies

The accounting policies set out below have been applied consistently to all periods presented in these financial statements.

### (A) Foreign currency transaction

Transactions in foreign currencies are translated to the functional currency at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies at the reporting date are retranslated to the functional currency at the exchange rate at that date.

The foreign currency gain or loss on monetary items is the difference between amortised cost in the functional currency at the beginning of the year, adjusted for effective interest and payments during the year, and the amortised cost in foreign currency translated at the exchange rate at the end of the year.

At each reporting date, monetary items and non-monetary assets and liabilities that are fair valued and are denominated in foreign currencies are translated at the rate prevailing on the statement of financial position. Gains and losses arising on retranslation of financial instruments at fair value through profit or loss are included in the statement of comprehensive income together with respective fair value gains/losses.

### (B) Financial instruments

#### Initial recognition

The Company initially recognises financial assets and liabilities issued on the date that they are originated. All other financial assets (including financial assets designated at fair value through profit or loss) and all other financial liabilities (including financial liabilities designated at fair value through profit or loss) are recognised initially on the trade date, which is the date that the Company becomes a party to the contractual provisions of the instrument.

The Company has designated its holdings in US Treasury Bills and its Certificates issued at fair value through profit or loss.

#### Derecognition

The Company derecognises a financial asset when the contractual rights to the cash flows from the asset expire, or it transfers the rights to receive the contractual cash flows on the financial asset in a transaction in which substantially all the risks and rewards of ownership of the financial asset are transferred. Any interest in transferred financial assets that is created or retained by the Company is recognised as a separate asset or liability. The Company derecognises a financial liability when its contractual obligations are discharged, cancelled or expire.

#### Offsetting

Financial assets and liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Company has a legal right to offset the amounts and intends either to settle on a net basis or to realise the asset and settle the liability simultaneously.

# Annual Report and Audited Financial Statements 2013

## 3. Significant accounting policies (continued)

### (B) Financial instruments (continued)

#### Subsequent measurement

After initial measurement, the Company measures financial instruments which are classified at fair value through profit or loss at their fair value. Subsequent changes in the fair value of financial instruments designated at fair value through profit or loss are recognised directly in the statement of comprehensive income. Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction. The fair value of financial instruments is based on their quoted market prices on a recognised exchange or sourced from a reputable broker/counterparty, in the case of non-exchange traded instruments, at the reporting date without any deduction for estimated future selling costs.

#### Derivative financial instruments

Derivative financial instruments include all derivative assets and liabilities that are used to economically hedge the derivatives of each Series from any interest rate and market fluctuations affecting the relevant collateral assets. Such derivatives are not however formally designated into a qualifying hedge relationship and therefore all changes in their fair value are recognised immediately in the statement of comprehensive income.

#### Fair value measurement principles

Financial assets designated at fair value through profit or loss is priced at their current bid prices. If a quoted market price is not available on a recognised stock exchange, the fair value of the financial instruments may be estimated by the Directors based on values obtained from brokers and specialist pricing vendors who may use a variety of valuation techniques such as discounted cash flow techniques, option pricing models or any other valuation technique that provides an estimate of prices obtained should the investment be traded. If other independent prices were available for the investments, the valuation may be different to those presented and those differences could be material. Therefore, the realisable value of the Company's investments may differ significantly from the fair value recorded.

Where discounted cash flow techniques are used, estimated future cash flows are based on the Directors' best estimates and the discount rates. The discount rate used is a market rate at the reporting date applicable for an instrument with similar terms and conditions. Where other pricing models are used, inputs are based on market data available at the reporting date. Subsequent changes in the fair value of financial instruments at fair value through profit or loss are recognised in the statement of comprehensive income. Where the Company holds derivatives with offsetting markets risks, it uses mid-market prices as a basis for establishing fair values for the offsetting risk position and applies this bid or asking price to the net open position as appropriate.

### (C) Changes in accounting policies

There were no changes to accounting policies which had an impact on Company's financial statements during the year.

#### Standards, amendments and interpretations that are not yet effective but relevant for the Company's operations

IFRS 9, 'Financial instruments', effective for annual periods beginning on 1 January 2018, specifies how an entity should classify and measure financial assets and liabilities, including some hybrid contracts. The standard improves and simplifies the approach for classification and measurement of financial assets compared with the requirements of IAS 39. Most of the requirements in IAS 39 for classification and measurement of financial liabilities were carried forward unchanged. The standard applies a consistent approach to classifying financial assets and replaces the numerous categories of financial assets in IAS 39, each of which had its own classification criteria. The Company is yet to assess IFRS 9's full impact and intends to adopt IFRS 9 no later than the accounting period beginning on 1 January 2018. The Company will also consider the impact of the remaining phases of IFRS 9 when completed by the Board.

# Annual Report and Audited Financial Statements 2013

## 3. Significant accounting policies (continued)

### (C) Changes in accounting policies (continued)

#### Standards, amendments and interpretations that are effective and relevant for the Company's operations

The amendments to IFRS 7 disclosure - Offsetting financial assets and liabilities, effective for annual periods beginning on or after 1 January 2013, clarify the requirements relating to the offset of financial assets and financial liabilities. Specifically, the amendments clarify the meaning of 'currently has a legally enforceable right of set off' and 'simultaneous realisation and settlement'. The Directors do not anticipate that the application of these amendments to IAS 32 will have a significant impact on the Company's financial statements as the Company do not have any financial assets and financial liabilities that qualify for offset.

There are no other standards, interpretations or amendments to existing standards that are not yet effective that would be expected to have a significant impact on the Company.

### (D) Financial liability and equity

The financial instruments issued by the Company are treated as equity (i.e. forming part of shareholder's funds) only to the extent that they meet the following two conditions:

- they include no contractual obligations upon the Company to deliver cash or other financial assets or to exchange financial assets or financial liabilities with another party under conditions that are potentially unfavourable to the Company; and
- where the instrument will or may be settled in the Company's own equity instruments, it is either a non-derivative that includes no obligation to deliver a variable number of the Company's own equity instruments or is a derivative that will be settled by the Company's exchanging a fixed amount of cash or other financial assets for a fixed number of its own equity instruments.

To the extent that this definition is not met, the proceeds of issue are classified as a financial liability. Where the instrument so classified takes the legal form of the Company's own shares, the amounts presented in these financial statements for called up share capital exclude amounts in relation to those shares.

Where a financial instrument that contains both equity and financial liability components exists, these components are separated and accounted for individually under the above policy. The finance cost on the financial liability component is correspondingly higher over the life of the instrument.

Finance payments associated with financial liabilities are dealt with as part of net finance (loss)/gain on debt certificates issued. Finance payments associated with financial instruments that are classified in equity are distributions from the net income attributable to equity holders and are recorded directly in equity.

### (E) Cash and cash equivalents

Cash and cash equivalents includes deposits held at call with banks which are subject to insignificant risk of changes in their fair value, and are used by the Company in the management of its short term commitments.

### (F) Share capital

Share capital is issued in Euro ("EUR"). Incremental costs directly attributable to the issue of new shares are shown in equity as a deduction from the proceeds.

### (G) Net (loss)/gain on fair value of financial assets designated at fair value through profit or loss

Net (loss)/gain on fair value of financial assets designated at fair value through profit or loss relates to holdings in US Treasury Bills and includes all realised and unrealised fair value changes.

### (H) Net (loss)/gain on derivative financial instruments

Net (loss)/gain on derivative financial instruments relates to the fair value movements on total return swaps held by the Company and includes realised and unrealised fair value changes.

### (I) Net gain/(loss) on fair value of financial liabilities designated at fair value through profit or loss

Net gain/(loss) on fair value of financial liabilities designated at fair value through profit or loss relates to Certificates issued and includes all realised and unrealised fair value change.

# Annual Report and Audited Financial Statements 2013

## 3. Significant accounting policies (continued)

### (J) Net swap (expense)/income- total return swaps

Net swap income/(expense) relates to net swap expense and income on total return swaps held by the Company.

### (K) Tax on profit on ordinary activities

Tax on profit on ordinary activities is recognised in the statement of comprehensive income except to the extent that it relates to items recognised directly in equity, in which case it is recognised in equity consistent with the accounting for the item to which it is related.

Current tax is the expected tax payable on the taxable income for the year, using tax rates applicable to the Company's activities enacted or substantively enacted at the reporting date, and adjustment to tax payable in respect of previous years.

A deferred tax asset is recognised only to the extent that it is probable that future taxable profits will be available against which the asset can be utilised. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

### (L) Other income and expenses

All income and expenses are accounted for on an accruals basis.

### (M) Segmental reporting

An operating segment is a component of an entity that engages in business activities from which it may earn revenues and incur expenses (including revenues and expenses relating to transactions with other components of the same entity). The Chief Operating Decision Maker (CODM) of the operating segment is the Board. The CODM is responsible for the Company's entire Series. The Company is a special purpose vehicle whose principal activities are the issuance of Certificates and investment in US Treasury bills. The board of Directors believe that each Series can be treated as a segment as the return on each Series is linked to a different Commodity Index.

	363,569	2,793,413

Other payables include:

- US Treasury Bills purchased on 31 December 2013 which were settled after the year end amounting to USD 284,991 (2012: USD 1,517,938).
- Payable to Swap Counterparty on 31 December 2013 amounting to USD 60,414 (2012: USD 1,191,477).

All other payables are current since payment is due within one year or less. Refer to note 21 for credit risk and currency risk disclosures relating to other payables.

## 14. Segmental reporting

The split of financial assets designated at fair value through profit or loss, financial liabilities designated at fair value through profit or loss and derivative financial instruments by Series are shown in notes 15, 16 and 17 to the financial statements respectively. All of the financial assets designated at fair value through profit or loss consist of US Treasury Bills. Details of the fair value movement by Series and the year end unit price by Series are included in note 16 which are the key measures of performance for each Series. The split of assets, liabilities and return by Series is prepared on a consistent basis with the measurement and recognition principles of IFRSs. Cash and cash equivalents, other receivables and other payables at 31 December 2013 have not been split by Series. The Company is domiciled in Ireland.

## Annual Report and Audited Financial Statements 2013

### 14. Segmental reporting (continued)

Each Series is structured to generate fair value gains on the Certificates which are linked to the return on the respective underlying index in accordance with the Series Prospectus. As such the Directors deem all other profit and loss movements to be immaterial to the Series and have not included further disclosures. The Certificates of Series 1, 7, 9, 11 and 23 are listed on both the Irish Stock Exchange and Frankfurt Stock Exchange. The Certificates of Series 25 is listed on Irish Stock Exchange, Frankfurt Stock Exchange and Six Swiss Exchange.

The Certificates of Series 28 is listed on the Six Swiss Exchange. They are available for purchase at the request of the Authorised Participants or the Company. The geographical location of the T-Bills is the United States. The Company has no assets classified as non-current assets. There were no changes in the reportable segments during the year. There were no transactions between reportable segments during the year.

\* Amount includes nil (2012: USD 1,651,724) relating to Certificates issued on 31 December 2013 which were settled after the year end.

# Annual Report and Audited Financial Statements 2013

## 16. Financial liabilities designated at fair value through profit or loss (continued)

Certificates issued for a particular Series are designated at fair value through profit and loss when the related US Treasury Bills and derivatives are fair valued or when they contain embedded derivatives that significantly modify cash flows that otherwise would be required to be separated.

The Company's obligations under the Certificates issued and related derivative financial instruments are secured by collateral held as stated in note 15.

In the event that the accumulated losses prove not to be recoverable during the life of the Certificates issued, this will reduce the obligation to the holders of the Certificates issued by the Company.

The Certificates of Series 1, 7, 9, 11 and 23 are listed on both the Irish Stock Exchange and Frankfurt Stock Exchange.

The Certificates of Series 25 is listed on Irish Stock Exchange, Frankfurt Stock Exchange and Six Swiss Exchange. The Certificates of Series 28 is listed on the Six Swiss Exchange.

	1,010,623	(113,368)	897,255	-	-	897,255

The Company enters into a derivative contract for each Series Company either to reduce the mismatch between the amounts payable in respect of the Certificates and return from the US Treasury Bills held as collateral or to mitigate its exposure to market risk (interest rate risk and currency risk) within the Company. Net swap expense for the year ended 31 December 2013 is USD 19,210,178 (2012: net swap income of USD 1,542,802).

### Swap transaction

The fair value of the derivatives relates to total return swaps.

### Total return swaps

The Certificates are linked to the relevant Commodity Index by the Company entering into total return swaps with the swap counterparties referencing such Commodity Index. Each time Certificates are issued, redeemed or repurchased, corresponding swap transaction(s) will be entered into (or existing swap transaction(s) will be upsized) or terminated (or downsized), as applicable.

## 18. Share capital

Kevin McEvoy	-	1
	40,000	40,000

## 19. Ownership of Company

The principal shareholder of the Company is Deutsche International Finance (Ireland) Limited which holds 39,994 shares in trust. A Board of Directors has been appointed at the date of inception to manage the day to day affairs of the Company. The Board has considered who the ultimate controlling party of the Company is. The Board has concluded that no individual party involved in the structure as identified on page 1 has the power to alter, in any way, the strategic investment objective of the Series as set out in the Series' prospectus. Substantially all the risks and rewards of the Company are transferred to the Certificate holders.

# Annual Report and Audited Financial Statements 2013

## 20. Related party transactions

Both Directors, Conor Blake and Margaret Kennedy, are employees of Deutsche International Corporate Services (Ireland) Limited, which is the administrator of the Company and a related Company of Deutsche International Finance (Ireland) Limited. During the year, the Company incurred a fee of EUR35,000 (2012: EUR35,000) relating to administration services provided by Deutsche International Corporate Services (Ireland) Limited. Conor Blake as director of Deutsche International Finance (Ireland) Limited has an interest in the administration fees. All expenses are settled by the arranger.

Management fees paid to the Arranger amounted to USD 551,490 (2012: USD 1,063,794) and USD 82,101 (2012: USD 104,777) is payable as at 31 December 2013. The Directors received no remuneration from the Company in the year (2012: Nil).

## 21. Financial risk management

Source Commodity Markets Plc (the "Company") is a limited liability company, incorporated in Ireland under the Companies Acts, 1963 to 2013 and has established the T-Bill Secured ETC Programme pursuant to which the Company may, from time to time, issue secured exchange traded commodity linked certificates on the terms set out in the Prospectus and Final Terms in respect of the relevant Certificates. The aggregate number of Certificates outstanding under the Programme will not at any time exceed 5,000,000,000.

### Risk management framework

The Company has exposure to the following risks from its use of financial instruments:

- Operational risk;
- Credit risk;
- Market risk; and
- Liquidity risk.

This note presents information about the Company's exposure to each of the above risks, the Company's objectives, policies and processes for measuring and managing risk and the Company's management of capital.

### Operational risk

Operational risk is the risk of direct or indirect loss arising from a wide variety of causes associated with the Company's processes, personnel and infrastructure, and from external factors other than credit, markets and liquidity issues such as those arising from legal and regulatory requirements and generally accepted standards to corporate behaviour.

Operational risks arise from all of the Company's operations. The Company was incorporated with the purpose of engaging in those activities outlined in the preceding paragraphs. All management and administration functions are outsourced to Deutsche International Corporate Services (Ireland) Limited. Wells Fargo Bank N.A acts as banker, portfolio administrator and custodian for the Company. The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework.

The Company is also exposed to operational risks such as custody risk. Custody risk is the risk of loss of securities held in custody occasioned by the insolvency or negligence of the custodian. Although an appropriate legal framework is in place that eliminates the risk of loss of value of the securities held by the custodian, in the event of its failure, the ability of the Company to transfer the securities might be temporarily impaired.

### Credit risk

Credit risk is the risk of financial loss to the Company if a counterparty to a financial instrument fails to meet its contractual obligations. The Company's principal financial assets are cash and cash equivalents, other receivables, derivative financial assets and financial assets designated at fair value through profit or loss, which represents the Company's maximum exposure to credit risk.

The carrying amount of financial assets represents the maximum credit exposure. The maximum exposure to the credit risk at the reporting date was:

	31 December 2013 US\$	31 December 2012 US\$
Financial assets designated at fair value through profit or loss	41,045,747	201,849,732
Cash and cash equivalents	459,039	2,899,390
Other receivables	2	1,655,149
Derivative financial assets	-	897,255
	<u>41,504,788</u>	<u>207,301,526</u>

# Annual Report and Audited Financial Statements 2013

## 21. Financial risk management (continued)

### Credit risk (continued)

#### Credit quality of financial assets

Description	Rating	31 December 2013		31 December 2012	
		%	USD	%	USD
US Treasury					
Bills	AAA	100%	41,045,747	100%	201,849,732
		100%	41,045,747	100%	201,849,732

None of the investments held were past due or defaulted. As disclosed in note 15, the US Treasury Bills are held on a segregated basis by the Custodian, Wells Fargo Bank.

#### Other receivables

Other receivables relates to the NPV fees receivable by the Company.

#### Cash and cash equivalents

The Company held cash and cash equivalents of USD 459,039 as at 31 December 2013 (2012: USD 2,899,390) which represents its maximum credit exposure on these assets. The cash and cash equivalents are held, on an unsecured basis, with bank and financial institution counterparties, which are rated by Standard & Poor's as follows:

	31 December 2013	31 December 2012
Wells Fargo Bank, N.A.	A-1+	AA-
Deutsche Bank AG, London Branch	A-1	A+/A-1
Bank of Ireland	B	B

#### Concentration risk

The financial instruments held by the Company and concentration risk of each is outlined below:

**Collateral:** Financial assets held by the Company relates to holdings in US Treasury Bills.

**Liabilities:** Financial liabilities held by the Company represent Secured, Limited Recourse Certificates.

	31 December 2013	31 December 2012
	USD	USD
Financial assets designated at fair value through profit or loss	41,045,747	201,849,732
Financial liabilities designated at fair value through profit or loss	40,679,760	204,438,473

With respect to derivative financial instruments, credit risk arises from the potential failure of counterparties to meet their obligations under the contract or arrangement. The Company's maximum credit risk exposure to derivative instruments as at 31 December 2013 is disclosed in note 17.

The maximum exposure to credit risk from investments at the reporting date by geographic region was:

	31 December 2013	31 December 2012
	USD	USD
United States	41,045,747	201,849,732

Goldman Sachs International, JP Morgan Chase Bank, N.A., Morgan Stanley & Co. International and Merrill Lynch International are the counterparties on all the swap transactions. They are currently rated as follows by S&P's:

	31 December 2013	31 December 2012
Goldman Sachs International	A-1	A-1
JP Morgan Chase Bank, N.A	A-1	A-1
Morgan Stanley & Co. International	A-2	A-1+
Merrill Lynch International	A-1	A-1

The Directors are therefore satisfied with the current exposure.

#### Market risk

Market risk is the risk that changes in market prices will affect the Company's income or the value of its holdings of financial instruments. The Certificates are linked to the relevant Commodity Index by the Company entering into total return swaps with the swap counterparties referencing such Commodity Index. Market risk embodies the potential for both gains and losses and price risk. The Certificate holders are therefore exposed to the market risk of the assets portfolio. The Company uses short term Treasury Bills and total return swaps to manage its market risk.

## Annual Report and Audited Financial Statements 2013

### 21. Financial risk management (continued)

#### Market risk (continued)

##### (i) Interest rate risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The value of the Treasury Bills reflects market conditions and is sensitive to the implied yield of the assets. This risk is offset in part by the funding leg of the commodity swaps, and the Company manages the risk

by endeavouring to ensure that the portfolio of Treasury Bills it holds corresponds to the portfolio of Treasury Bills used to construct the yield assumptions used in determining the performance of the commodity indices. The Company does not consider interest rate risk to be significant to the Company as any fluctuation in the value of Treasury Bills as a result of interest rate moves that is not offset by the funding leg of the commodity swaps will be borne by the Certificate holders.

# Annual Report and Audited Financial Statements 2013

## 21. Financial risk management (continued)

### Market risk (continued)

#### (i) Interest rate risk (continued)

##### Sensitivity analysis

The sensitivity analysis below has been determined based on the Company's exposure to interest rates for interest bearing assets and liabilities (included in the interest rate exposure tables above) at the reporting date and the stipulated change taking place at the beginning of the financial year and held constant throughout the reporting year in the case of instruments that have floating rates. Since the Company does not hold large sums of cash, cash and cash equivalents have been excluded.

A change of 100 basis points in interest rates at the reporting date would have increased or (decreased) fair value of financial assets issued by the amounts shown below. For variable instruments, this analysis assumes that all other variables, in particular foreign currency rates, remain constant. The analysis is performed on the same basis for 2012.

#### (ii) Currency risk

2013	Increase USD	Decrease USD
Financial assets designated at fair value through profit or loss	410,457	410,457

#### 2012

Financial assets designated at fair value through profit or loss	2,018,497	2,018,497
--	-----------	-----------

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates.

The Company's exposure to currency risk is not significant and is limited to share capital issued of €40,000 (USD 54,652). All other financial assets and financial liabilities are denominated in US Dollars.

##### Sensitivity analysis

The Directors confirm that any movement in foreign exchange currency will not have a material impact on the assets and liabilities of the Company. Hence, no sensitivity analysis is performed.

The following significant exchange rates have been applied during the year.

	31 December 2013	31 December 2012
EUR-USD	1.3742	1.3193

#### (iii) Price risk

Price risk is the risk that the value of financial instruments will fluctuate as a result of changes in market prices, whether caused by factors specific to an individual investment, its issuer or all factors affecting all instruments traded in the market. The Company does not consider price risk to be a significant risk to the Company as any fluctuation in the value of financial assets designated at fair value through profit or loss held by the Company will be borne by the Certificate holders.

##### Sensitivity analysis

Any changes in the quoted prices of the financial assets designated at fair value through profit or loss or the fair value of the total return swaps held by the Company would not have any material effect on the equity or statement of comprehensive income of the Company as any fair value fluctuations in the financial assets would be offset by corresponding changes in the fair value of the financial liabilities and as such any changes are ultimately borne by the Certificate holders.

Hence, assuming all other items to be constant, any increase or (decrease) in the market price of the US Treasury Bills at 31 December 2013 would have an equal % increase or (decrease) in the value of Certificates issued.

##### Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its obligations as they fall due. The Company limits its exposure to liquidity risk by investing in short term Treasury Bills. The Company will only repay the Certificate holders to the extent that proceeds are available from the Treasury Bills. This means that all substantial risks and rewards associated with the financial assets are ultimately borne by the Certificates holders.

All of the Company's liabilities have a maturity profile of less than one year and therefore, the carrying amount and the gross contractual cashflows are equal to the fair value of each liability as stated in the statement of financial position.

# Annual Report and Audited Financial Statements 2013

## 21. Financial risk management (continued)

### Accounting classifications and fair values

#### Fair values versus carrying amounts

The fair values of financial assets and liabilities, together with the carrying amounts shown in the statement of financial position, are shown as follows:

	At amortised cost 31 December 2013 USD	At fair value through profit or loss 31 December 2013 USD	Designated at fair value through profit or loss 31 December 2013 USD	Total Fair value 31 December 2013 USD

## 21. Financial risk management (continued)

### Accounting classifications and fair values (continued)

#### Fair values hierarchy

The Company's financial assets, derivative financial instruments and financial liabilities issued are carried at fair value on the statement of financial position. Usually the fair value of the financial instruments can be reliably determined within a reasonable range of estimates. The carrying amounts of all the Company's financial assets and financial liabilities at the reporting date approximated their fair values.

The Company's financial instruments carried at fair value are analysed below by valuation method.

The different levels have been defined as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction on the measurement date.

Fair values of financial assets and financial liabilities that are traded in active markets, Level 1, are based on quoted market prices or dealer price quotations. For all other financial instruments the Company determines fair values using valuation techniques.

Valuation techniques include net present value and discounted cash flow models, comparison to similar instruments for which market observable prices exist, Black-Scholes and polynomial option pricing models and other valuation models. Assumptions and inputs used in valuation techniques include risk-free and benchmark interest rates, credit spreads and other premia used in estimating discount rates, bond and equity prices, foreign currency exchange rates, equity and equity index prices and expected price volatilities and correlations. The objective of valuation techniques is to arrive at a fair value determination that reflects the price of the financial instrument at the reporting date that would have been determined by market participants acting at arm's length.

Level 2 prices use widely recognised valuation models for determining the fair value of common and more simple financial instruments such as interest rate and currency swaps that use only observable market data and require little management judgement and estimation. Observable prices and model inputs are usually available in the market for listed debt and equity securities, exchange traded derivatives and simple over the counter derivatives, e.g. interest rate swaps. Availability of observable market prices and model inputs reduces the need for management judgement and estimation and also reduces the uncertainty associated with determination of fair values. Availability of observable market prices and inputs varies depending on the products and markets and is prone to changes based on specific events and general conditions in the financial markets.

For more complex Level 3 instruments proprietary valuation models are used which usually are developed from recognised valuation models. Some or all of the significant inputs into these models may not be observable in the market, and are derived from market prices or rates or are estimated based on assumptions. Examples of instruments involving significant unobservable inputs include certain over the counter derivatives and certain securities for which there is no active market. Valuation models that employ significant unobservable inputs require a higher degree of management judgement and estimation in the determination of fair value. Management judgement and estimation are usually required for selection of the appropriate valuation model to be used, determination of expected future cash flows on the financial instrument being valued, determination of probability of counterparty default and selection of appropriate discount rates.

## 21. Financial risk management (continued)

Accounting classifications and fair values (continued)

Fair values hierarchy (continued)

At 31 December 2013 and 2012, the carrying amounts of financial assets, derivative financial instruments and financial liabilities issued by the Company which fair values were determined directly, in full or in part, by reference to published price quotations and determined using valuation techniques are as follows:

Fair value hierarchy as at 31 December 2013				
	Level 1	Level 2	Level 3	Total
	USD	USD	USD	USD
Financial assets designated at fair value through profit or loss –				
US Treasury Bills	-	41,045,747	-	41,045,747
Financial liabilities designated at fair value through profit or loss –				
Commodity Linked Notes	-	(40,679,760)	-	(40,679,760)
Derivative financial liabilities	-	(391,819)	-	(391,819)
	-	(25,832)	-	(25,832)

Fair value hierarchy as at 31 December 2012				
	Level 1	Level 2	Level 3	Total
	USD	USD	USD	USD
Financial assets designated at fair value through profit or loss –				
US Treasury Bills	-	201,849,732	-	201,849,732
Financial liabilities designated at fair value through profit or loss –				
Commodity Linked Notes	-	(204,438,473)	-	(204,438,473)
Derivative financial assets	-	1,010,623	-	1,010,623
Derivative financial liabilities	-	(113,368)	-	(113,368)
	-	(1,691,486)	-	(1,691,486)

Although the Directors believe that their estimates of fair value are appropriate, the use of different methodologies or assumptions could lead to different measurements of fair value as fair value estimates are made at a specific point in time, based on market conditions and information about the financial instrument.

For recognised fair values of financial assets measured using significant unobservable inputs, changing one or more assumptions used to reasonably possible alternative assumptions would not have any effect on the profit or loss or on equity as any change in fair value will be borne by the Certificate holders due to the limited recourse nature of the financial liabilities issued by the Company.

The Commodity linked Certificates are exchange traded. As such, the commodity linked Certificates are classified as Level 2 in the fair value hierarchy.

## Annual Report and Audited Financial Statements 2013

### 22. Fair value of financial assets and financial liabilities that are not measured at fair value on a recurring basis (but fair value disclosures are required)

The directors consider the carrying amounts of financial assets and financial liabilities recognised in the financial statements approximate their fair values. The fair value hierarchy of these financial assets and liabilities are as follows:

	Level 1 31 December 2013 USD	Level 2 31 December 2013 USD	Level 3 31 December 2013 USD	Total 31 December 2013 USD
<b>Financial assets</b>				
Cash and cash equivalents	459,039	-	-	459,039
Other receivables	-	2	-	2
<b>Financial liabilities</b>				
Other payables	-	(363,569)	-	(363,569)
	459,039	(363,567)	-	95,472

	Level 1 31 December 2012 USD	Level 2 31 December 2012 USD	Level 3 31 December 2012 USD	Total 31 December 2012 USD
<b>Financial assets</b>				
Cash and cash equivalents	2,899,390	-	-	2,899,390
Other receivables	-	1,655,149	-	1,655,149
<b>Financial liabilities</b>				
Other payables	-	(2,793,413)	-	(2,793,413)
	2,899,390	(1,138,264)	-	1,761,126

### 23. Capital risk management

The Company views the share capital as its capital. The Company is a special purpose vehicle set up to issue debt for the purpose of making investments as defined under the programme memorandum and in each of the Series memorandum agreements.

Share capital of EUR 40,000 (USD 54,652) was issued in line with Irish Company Law and is not used for financing the investment activities of the Company.

The Company is not subject to any other externally imposed capital requirements.

### 24. Operating expenses

All costs associated with the Company are paid by Source UK Services Limited, including the corporate administration fee amounting to EUR 35,000 (2012: EUR 35,000) and audit fees USD 65,517 (2012: USD 62,898) respectively.

No director fees were paid during the year (2012: Nil).

### Auditors' remuneration

	Year ended 31 December 2013 USD	Year ended 31 December 2012 USD
Statutory audit	65,517	62,898
Tax advisory services	37,707	34,302
	103,224	97,200

There were no other assurance services, tax advisory services or other non audit services performed by PricewaterhouseCoopers Ireland as auditor of the Company.

### 25. Subsequent events

There has been no significant event since the year end up to the date of signing this report that requires disclosure in the financial statements.

### 26. Approval of financial statements

The Board of Directors approved these financial statements on 16 April 2014.
