Invesco EUR Corporate Bond ESG Short Duration Multi-Factor UCITS ETF

Investment Risks

For complete information on risks, refer to the legal documents. The value of investments and any income will fluctuate (this may partly be the result of exchange rate fluctuations) and investors may not get back the full amount invested. The creditworthiness of the debt the Fund is exposed to may weaken and result in fluctuations in the value of the Fund. There is no guarantee the issuers of debt will repay the interest and capital on the redemption date. The risk is higher when the Fund is exposed to high yield debt securities. Changes in interest rates will result in fluctuations in the value of the fund. The Fund intends to invest in securities of issuers that manage their ESG exposures better relative to their peers. This may affect the Fund's exposure to certain issuers and cause the Fund to forego certain investment opportunities. The Fund may perform differently to other funds, including underperforming other funds that do not seek to invest in securities of issuers based on their ESG ratings. The Fund's performance may be adversely affected by variations in the exchange rates between the base currency of the Fund and the currencies to which the Fund is exposed.

Invesco Systematic and Factor Investing (SFI) integrated ESG approach

SFI follows a fully integrated ESG investment process which is built on a longstanding experience in customized ESG solutions and active engagement with companies.

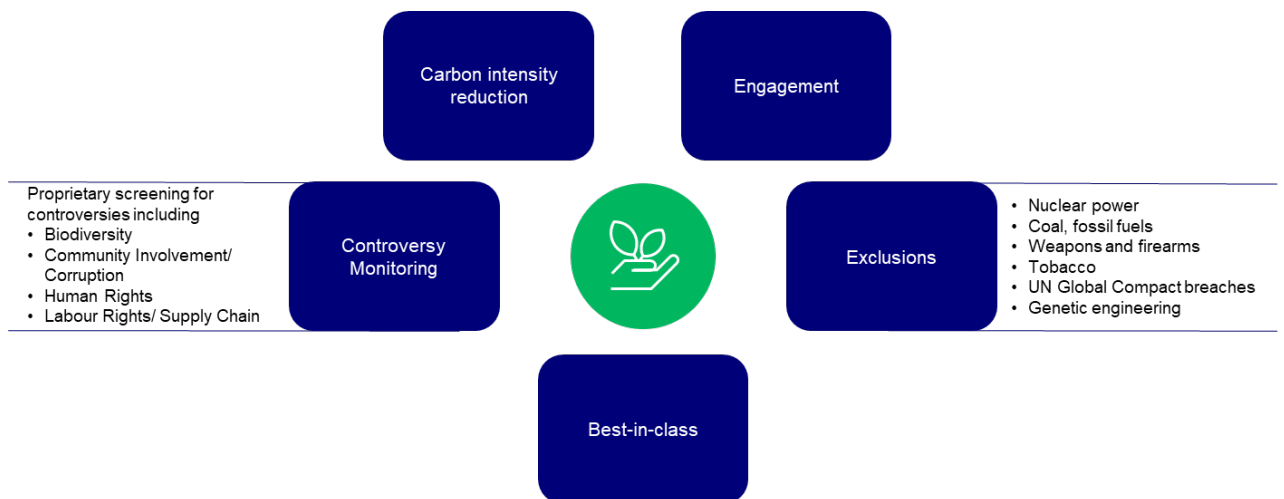

ESG aspects are considered in each step of the multi-factor investment process - the definition of the universe, portfolio construction and finally risk management.

There three main pillars of ESG integration in the investment process - norm-based exclusions, controversy screening and application of the best-in-class filter.

Adverse ESG momentum measures are applied to restrict companies which face weak ESG scores and significant ESG downgrades, respectively.

Beyond a broad-based integration across all portfolios, a **carbon control** can be applied during portfolio construction to obtain a better overall carbon footprint in comparison to an underlying benchmark or investment universe.

The ESG integration process can be customised to meet client specific ESG requirements, as well as internationally recognized norms, conventions and renowned ESG quality labels.

Source: Invesco Systematic and Factor Investing. For illustrative purposes only. Any investment decision should take into account all the characteristics of the fund as described in the legal documents. For sustainability related aspects, please refer to <https://www.invescomanagementcompany.ie/dub-manco> The investment concerns the acquisition of units in an actively managed fund and not in a given underlying asset.

Overall ESG Scores

ESG theme scores

	Portfolio	Benchmark
Environment	7.6	7.6
Social	4.9	5.0
Governance	6.5	5.8
Weighted coverage ¹	100.0%	95.5%

The Austrian Eco-Label was awarded to the Fund by the Federal Ministry for Climate Protection, Environment, Energy, Mobility, Infrastructure and Technology (BMK) because, in addition to economic criteria, ecological and social criteria are also taken into account when selecting shares. The eco-label ensures that these criteria and their implementation are suitable for selecting appropriate shares. This has been independently verified. The award of the eco-label does not represent an economic evaluation and does not allow any conclusions to be drawn about the future performance of the financial product. For more information, visit <https://www.umweltzeichen.at>

The European SRI Transparency logo signifies that Invesco Systematic and Factor Investing commits to provide accurate, adequate and timely information to enable stakeholders, in particular consumers, to understand the Socially Responsible Investment (SRI) policies and practices relating to the fund. Detailed information about the European SRI Transparency Guidelines can be found on www.eurosif.org, and information of the SRI policies and practices of Invesco EUR Corporate Bond ESG Short Duration Multi-Factor UCITS ETF can be found at: <https://etf.invesco.com/>. The Transparency Guidelines are managed by Eurosif, an independent organisation. The European SRI Transparency Logo reflects the fund manager's commitment as detailed above and should not be taken as an endorsement of any particular company, organisation or individual.

The Belgian label "Towards Sustainability" was developed in 2019 on the initiative of Febelfin, the Belgian association of the financial sector, and is awarded by the independent organization Central Labelling Agency. For more information, visit www.towardsustainability.be.

ESG Portfolio Report

Invesco EUR Corporate Bond ESG Short Duration Multi-Factor UCITS ETF

Carbon Footprint Analysis - Key Data¹

	Portfolio	Benchmark	Delta
CO2 Intensity (Scope 1)	27.1	65.9	-38.8
CO2 Intensity (Scope 2)	22.5	17.2	5.3
CO2 Intensity (Scope 1 + 2)	49.6	83.1	-33.5
CO2 Intensity Total (Scope 1 + 2 + 3)	1092.1	1243.2	-151.1

Global Norms & Initiatives²

	Portfolio	Benchmark
UN Global Compact breaches (% weight)	0.0%	0.2%
Science-based Climate or Emissions Targets Set (% weight)	43.2%	39.2%
Science-based Climate or Emissions Targets Committed (% weight)	15.5%	14.8%

UN Global Compact screening identifies companies that violate the United Nations Global Compact Principles.

Targets are considered "science-based" if they are in line with decarbonization required to keep global temperature increase below 2°C as described in the Fifth Assessment Report of the Intergovernmental Panel on Climate Change.

Glossary:

Intensity: Carbon intensity is calculated using data from ISS Climate solutions. Carbon intensity is calculated as weighted average of the respective scope emissions(CO2 equivalents) per USD million of **CO2IntensityStat**.

Scope 1 emission: Issuers Scope 1 Direct emissions (tCO2e). The Direct emissions data represents the final, ISS-Ethix reviewed and approved value based on the ISS-Ethix Climate Solution methodology, which selects the accurate value from available sources.

Scope 2 emission: Issuers Scope 2 Energy Indirect emissions (tCO2e). The Energy Indirect emissions data represents the final, ISS-Ethix reviewed and approved value based on the ISS-Ethix Climate Solution methodology, which selects the accurate value from available sources.

Scope 3 emission: Issuer's Scope 3 "Other Indirect" emissions (tCO2e). For Scope 3 emissions, all provided data has been estimated. Reported Scope 3 emissions are generally unreliable and thus estimated Scope 3 emissions are included in this datapoint.

CO2 Total aggregate of Scope 1, Scope 2 and Scope 3.

Source: Invesco, Benchmark:Bloomberg Euro Corporate Bonds 1-5 years Index. ¹ Source: ISS Climate Solution. Weighted Coverage is the percentage of the portfolio and benchmark where the ISS Climate Solution Carbon data research is available. Portfolio level carbon intensity figures are an indicative measure of exposure to carbon risk that should be considered alongside sector and company specific metrics. Latest climate dataset available is as of 2022. ² Source: UN Global Compact screening based on MSCI Controversial screening. Indicates portfolio/ benchmark weight of holdings which fails to comply with UN Global Compact Norms.
