28 July 2015

**PowerShares Global Funds Ireland plc (the "Company")**

**Amendments to the investment policy of PowerShares FTSE RAFI All-World 3000 UCITS ETF (IE00B23LNQ02) (the "Fund")**

To: Shareholders of the Fund

Dear Shareholder,

Following a review of the Company's Prospectus and Supplements, the Directors of the Company intend to amend the supplement of the Fund as of 28 July 2015.

As you will be aware, the index of the Fund, the FTSE RAFI® All-World 3000 Net Index Total Return USD (the "Index"), consists of shares of the top 3000 companies across developed and emerging markets globally. On 17 January 2014 Shareholders were informed of the move from a synthetic replication to a full physical replication strategy with effect from 1 April 2014, and the Fund's supplement was updated accordingly.

The Fund, however, has been using an optimal sampling strategy since 1 April 2014 by which it holds approximately 1000 stocks in replication of the 3000 stocks in the Index. These holdings have been reflected in the Annual Report and Audited Financial Statements for the Fund for the year ended 30 September 2014. The Fund is fully transparent and the portfolio holdings are disclosed daily on the website [www.invescopowershares.net](http://www.invescopowershares.net) (and its local country sections).

The supplement of the Fund will be amended accordingly to reflect the Fund's use of an optimal sampling method.

The Directors, in consultation with Invesco PowerShares Capital Management LLC (the "Investment Manager"), believe it is in the best interests of the Fund and its Shareholders to gain Index exposure by using an optimal sampling method when tracking the Index. This means the Fund will so far as possible and practicable hold a sample of the components of the Index rather than each component of the Index. Due to the large number of components of the Index and the related high transaction costs, it is not efficient for the Fund to hold all the securities in the Index. The Directors believe that the use of an optimal sampling method to replicate the index since 1 April 2014 is in the best interests of Shareholders and has not had any detrimental impact on them.
